Fort Worth, Texas.
Cut Flower Department.

A BOX OF LOOSE CUT FLOWERS.
With their long stems and fine foliage, arranged with care, cause pleasant smiles of welcome when opened. A few flowers sent in this way makes a pretty informal present to a friend or acquaintance. For birthdays, a loose bunch of roses or other choice flowers—one for each year—are always acceptable. An idea may be given of the use to which the flowers are to be put and their cost, and by leaving selection to us we are almost sure to give satisfactory results. Many of our best customers leave all details in our hands, preferring to trust to our judgment. A fair-sized box varies from $2.50 to $5.00 in cost, while we go as low as $1.00 and $1.50 for small, and as high as you wish for very large.

FLOWERS IN BASKETS.
Put up in endless styles at prices from $1.50 upwards. Handle baskets are very satisfactory, as they at once present the idea of a basket full of flowers. A fair-sized basket of any style varies from $2.00 to $5.00 in cost, while we go as high as $15.00 to $25.00 for large ones.

BOUQUETS.
The size and price of bouquets can be estimated somewhat by the prevailing prices of roses at the time. Two to four dozen roses are usually required for a fair-sized bride’s bouquet.

Ladies’ Hand Bouquets, for balls, receptions, etc., made in a considerable range of sizes, $1.50 to $5.00 each.
Ladies’ Corsage Bouquets, 50 cents to $3.00 each.
Button-Hole Bouquets of carnations, rosebuds and fine flowers, 10 to 25 cents each.
Ladies’ Dress Button-Hole Bouquets, made larger than the above, 25 to 50 cents each.
Lunch Favors, for each plate or person, 25 cents to $1.00 each.
Bride’s Bouquets, composed of white roses, lily-of-the-valley or other delicate flowers, with or without ferns or ribbon, $5.00 to $10.00 each; the same, smaller, $3.00 to $5.00 each.
Bridesmaid’s Bouquets or Baskets, choicest quality, $4.00 to $8.00; choice, but slightly cheaper, $2.00 to $5.00.

FLOWERS FOR FUNERALS.
In ordering funeral flowers on short notice, please bear in mind that it will be to your advantage to give us as much time as possible—the more time we have the more care we can bestow on the work. If we know the time of funeral, it is often a great help to us in selecting the most suitable flowers as to durability, etc.
We give the two extremes in prices, both the highest and the lowest, as they vary according to size, quality and scarcity of flowers, time and labor required to arrange the work, etc.

Orders by Telegraph or Telephone. — When flowers are wanted the same day or next, it is always best to telegraph or telephone. By using the code words below an order can be sent in a very few words. Designate the size or quality by the price. For example: “Wave, Wreath, Five, Durable, Three,” means, “Send to-day or early to-morrow, wreath for $5.00 and white flowers for $8.00.” If you add the address of a person and the words “Hall” and “Snow,” we will enclose your card, PREPAY all charges and ship to address named. Nothing more practical. We give these details our personal attention. Telephone your orders when possible. The following cipher code will be found very useful:

Wool—Send on afternoon train to-day.
Wonder—Send on early train to-morrow.
World—Send on afternoon train to-morrow.
Wave—Send to-day or on early train to-morrow.
Dancing—if you cannot fill exactly as specified, you may substitute according to your best judgment.

Durable—White flowers for funeral purposes; colored flowers must not be used.

Flowers or Cut Flowers Unless otherwise specified, means assorted colors and kinds.

Hail—Prepay express charges and charge to me.

Snow—This is for a present: inclose my card.
Fall Catalogue

of

Bulbs, Roses, Trees and Seeds.

Order Bulbs at Once for Blooming During Winter and Spring.

How We Forward Bulbs, Plants and Seeds.

All Bulbs ordered singly or by the dozen will be sent by mail when so desired at prices quoted (unless specially noted); when ordered in larger quantities, they will be sent by express.

We would advise you to have your plants sent by express if possible, and we will put in larger plants and enough extra to pay express charges.

Important.

By recent ruling of the express companies trees will be carried at 20 per cent. less than the merchandise rates they have heretofore been shipped under. Of course, in places where there is no express office, plants have to be sent by mail; in such cases we use the greatest skill and care to have them arrive in good condition.

Seeds for Fall Sowing and for Texas and the South.

We desire to call the attention of our patrons in the extreme Southern States to the list in this Catalogue of the leading Vegetable Seeds for sowing in the fall.

How Best to Remit.

Remittances should be made either in the form of a P. O. Money Order, Bank Draft, Express Money Order, Express Purchasing Order or Registered Letter. Remittances in any other way are entirely at the sender's risk.

Orders from unknown correspondents not accompanied by a remittance, should give Fort Worth reference to save delay. If goods are wanted C. O. D., 35 per cent. of the amount must be remitted with the order.

Please note our prices on bulbs, roses and trees; compare them with others in the trade, and conclude that we are entitled to your patronage.

OUR CHOICE COLLECTION OF BULBS

For Winter-Blooming in the Conservatory or Window Garden.

These collections are made up of the same choice bulbs that we offer in this Catalogue and will give an endless amount of bloom throughout the winter. As they are offered at prices much below our Catalogue rates, we consequently can make no alterations. The "Full Collection" 60 bulbs, as enumerated below, prices, "Full Collection," $10.00, or prepaid by mail or express, $10.75.

20 Hyacinths, Splendid Named.
48 " Mixed Single and Double.
30 Tulips, Assorted Kinds.
24 Tulips, Named Double and Single.
48 " Mixed Varieties.
36 Narcissus, Splendid Named.
48 Crocus, Splendid Named.
100 " Mixed Sorts.
20 Allium Nigrum.
20 Anemone, Single and Double.
4 Arum Drimencus.
20 Babusses, Mixed.
4 Calla, White.
20 Chionodoxa.
4 Cyclamen Percephon.
36 Freesia.
20 Iris, Spanish, Mixed.
20 Ixias, Mixed.
36 Jonquil.
4 Lily, Peruvian Easter.
8 Ornithogalum, Arabicum.
20 Oxalis, Mixed.
20 Ranunculus.
20 Sila Sibiric.
20 Sparaxis, Mixed.
20 Tritlea, uniform.
20 Snowdrops.

"Half" of above collection of Winter-blooming Bulbs contains 30 bulbs. Price, $5.25; or by mail, $5.75.

"Quarter" of above collection of Winter-blooming Bulbs contains 170 bulbs. Price, $3.75; or by mail, $3.40.

"RAINBOW" COLLECTION OF HARDY BULBS

For Spring Flowering in the Garden.

These collections are made up of the same choice bulbs as are offered in this Catalogue. They are all perfectly hardy and should be planted in the open ground this autumn, and they will give a grand and continuous display of bloom throughout the spring. As they are offered at much less than our regular Catalogue rates we can allow of no alterations. As enumerated below, the "Full Collection" contains 900 bulbs. Price, "Full Collection," $110.00; by mail or express, prepaid, $116.75.

60 Hyacinths, Mixed, Colors Separate.
24 " Grape and Feathered.
60 Tulips, Single and Double, Named.
160 " Mixed, Single and Double.
20 " Mixed Parrot.
48 Narcissus, Splendid, Mixed.
200 Crocns, Mixed, Colors Separate.
100 " Named Sorts.
12 Allium Moly.
12 Bulbocodium vernum.
48 Chionodoxa.
4 Crown Imperial.
48 Snowdrops.
8 Fritillaria, Mixed.
20 Iris, assorted.
8 Leucogium vernum.
48 Scilla Amana.
12 " Campanula.
8 Lilies, Splendid Sorts, all different.

"Half" of above collection of "Hardy" Bulbs contains 420 bulbs, $8.75.

"Quarter" of above collection of "Hardy" Bulbs contains 225 bulbs, quarter quantities of each, $2.75; or by mail, $3.00.

Mixed Hyacinths

Mixed Hyacinths are the smaller bulbs selected from the named sorts, enabling us to offer them at very low prices, particularly in large quantities. They are well adapted for open ground planting, and as we furnish these in separate colors it enables the purchaser to plant them out in such designs as taste may dictate. Mixed Hyacinths are also extensively forced for winter blooming in the greenhouse and window gardens, and for cutting purposes on account of their low price. We strongly advise that Named Sorts be used when specimens are desired for pot and water culture. (See cut.)

Lord Wellington. Rich blue, striped with lilac, dark center. 10c. each, $1.00 dozen.
Price of none: a Martann. Dark violet blue, fine large truss. 8c. each, 75c. dozen.

ROMAN HYACINTHS.
The flowers, while smaller than those of the ordinary Dutch Hyacinth, are produced in such abundance—each bulb producing several flowers—that very graceful spikes of bloom; their delicious perfume, earliness and profusion of bloom have made Roman Hyacinths exceedingly popular. They are so easily grown and bloom so early that if potted in August and September, they can be brought into flower in November and December, and by a succession of plantings can be had in bloom throughout the winter. Fair cutting purposes the Roman Hyacinth is the finest bulb grown.

SINGLE EARLY TULIPS.
Tulips are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, renders them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine, and producing as fine flowers in the confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in beds of the above colors, may be maintained a longer display than if either are separately planted. In gardens where the flower beds are to be kept gay from the earliest day of spring, plant between the last frame and December. It is advisable to grow succession crops of Tulips snowdrops or Crocus, as these flower first and are through when the Tulips come into bloom.
The Single Tulip has a greater variety of rich, delicate and attractive colors than any other section of spring-flowering bulbs. Those only who have massed the different varieties, planting the bulbs 5 inches apart, can form any idea of their beauty and their great diversity in shade and color, and the grand effect they produce grouped in flower beds or borders. The Single Tulip is extensively grown for indoor decoration, three or five bulbs in a pot.
The letters A, B, C, following the varieties, indicate their earliness of bloom; the A's flower together and are the earliest; B next, C. The average height of each is also given to aid in arranging flower beds. If Tulips are desired by mail, add for postage at the rate of 5c per doz., or 40c per 100. Single bulbs are mailed free at prices given.

Duc Van Thol Tulips. Very early, which renders them valuable for forcing to bloom with the Roman Hyacinth and Paper White Narcissus.
D. V. T., red and yellow. A. 6. 20c doz., $1.00.
D. V. T., crimson (carmine). A. 7. 25c doz., $1.00—100.
D. V. T., white. A. 5. 45c each, 45c doz., $3.00—100.
D. V. T., yellow. A. 6. 5c each, 45c doz., $3.00—100.
D. V. T., rose. A. 6. 2 for 10c, 30c doz., $2.25—100.
D. V. T., scarlet. A. Rich dashing scarlet, highly prized as an early forcing sort and for pot culture. 25c doz., $1.00—100.
D. V. T., barred, reddish white. A. Fine large flower. 3 for 10c, 25c doz., $1.50—100.
D. V. T., orange. A. Reddish orange. 3 for 10c, 35c doz., $2.50—100.

DOUBLE TULIPS.
Double Tulips have massive flowers of brilliant and varied colors, shades and markings, and being double the flowers last much longer in bloom than single varieties, and, in consequence, make more flowers and, used in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden and for forcing in flower in March. A dozen or more around the edges of shrubbery. They are robust growers and exceedingly efficient. The early spring kinds (A or B) do splendidly when grown in pots for winter blooming, but must be forced much sooner than Single Early Tulips, by keeping them cooler.
The letters following the varieties indicate their earliness; those marked A flowers together and are not "B" follow, etc. "L" are very late. The figures indicate the average height in inches.

Duc van Thol, single red, double red and yellow. A. Very dwarf and fine for forcing. 25c doz., $1.00—100.
Duc van Thol, double scarlet. A. Very large flower, crimson scarlet, good color. 3 for 10c, 35c doz., $2.50—100.
Gloria Monili. A. Lavender, striped claret and white; very large double flower. 3 for 10c, 35c doz., $2.70—100.
La Belle Alliance. A. (Overwinnaar.) Large violet red, striped claret, late and tall. 3 for 10c, 35c doz., by an.
Le Blason. A. A beautiful variety, of delicate rose, shaded and striped with white, extra fine. 4 for 10c, each, 35c—100.
La Comedie. A. 8. Pure white, very full and large, extensively grown for bedding. A splendid show. 3 for 10c, 35c doz., $2.00—100.
Lady Fitzhugh. A. Cherry, rose and white, beautiful, good for forcing. 3 for 10c, 35c doz., $2.00—100.
Lion d'or, perfecta. A. Brilliant orange, dwarf, extra choice flower. 3 for 10c, 35c doz., $2.75—100.
Louis d'or, L12. Sturdy, very double, golden yellow, interior brightly splashed red. 4 for 10c, each, 35c—100.

PARROT OR DRAGON TULIPS.
These belong to the late flowering Tulips, and have immense attractive flowers of singular and picturesque forms and brilliant and varied colors. The petals are curiously fringed on the exterior with a trilling of colors, resembling the head of a parrot. They form extravagantly showy and very striking display. The Parrot Tulips are very attractive, with the intense red, and the yellow, and the orange, and the red and yellow. Some are deep rich red, and others are of the most richest and splendid hues, and should be grown in every flower garden in quantities.

Adumbrul de Constantino. Large red flowers, tipped orange.
Amethyst Rouge. Very handsome, large, deep crimson scarlet.
Markgraaf van Baden. Yellow, striped with scarlet and green.
Perfexta. Yellow, striped red.
Price of any of the above named varieties (except specially mentioned): 3 bulbs for 10c, 35c doz., $1.75—100.
Parrot Tulips, mixed colors. 30c per doz., $2.25—100.
Tulips are desired by mail, add 5c per dozen or 40c per 100.

LARGE TRUMPET NARCISSES.
All Yellow Varieties.
If desired by mail, add the rate of 10c per dozen for postage. Single bulbs mailed free.

Art-Rich, or Irish King. This is the earliest and most vigorous of Giant Trumpet Daffodils. It has the largest bell-shaped trumpet, full rich yellow. It is an extra fine sort for pot culture and flowering indoors. A splendid bloom. Golden Spur. One of the grandest Daffodils, with extra large, broad petals of bell-shaped trumpet; very broad and striking. It is of unusually robust habit and can be massed for gardens, pots or forcing. 10c each, $1.00 doz.
Hales Hermit. A. Gold, or Maximus. Very large flower of rich yellow. Remarkable for an elegantly twisted perianth, trumpet deep golden, large and well flanged. 10c each, 50c doz.

Obvallarius. The famous "Tenby Daffodil." Elegantly formed trumpet, large frilled flower. 3 for 10c, each, 35c doz.
LARGE TRUMPET NARCISSUS—Continued.

Trumpet Major. Flower large and almost of a uniform deep golden. Highly prized as an early forcing sort and largely planted for forcing. A 4 lb. bunch with 4 fl. oz. 5 sold at dozen rates; 25 at 100 rates. Postage free, except where noted.

NARCISSUS OR DAFFODILS.

Double (Camelia Flowered) Narcissus. If desired by mail, add at the rate of 10c per dozen for postage. Single bulbs mailed free.

Yellow Variety.

“Gardenia Flowered” White Variety.

Two Colored Varieties. (White and Yellow.)

Orange Phoenix. “Eggs and Bacon.” Beautiful double white flowers, with orange neckcy. Splendid for pot culture and cutting. 3 for 10c., 35c. doz.

POLYANTHUS NARCISSUS.

Or Bunch-Flowered Daffodils.

Note.—Polyanthus Narcissus, although not considered hardy, yet have always proved hardy with us with a covering, and produced much larger flowers, and more of them, than those grown in the house in pots.

If desired by mail, add for postage at the rate of 25c. per dozen. Single bulbs mailed free.

Yellow Varieties.

Grand Soleil d’Or. Rich yellow, with reddish orange cup—a favorite bedding and cutting variety. 3 for 10c., or by mail 15c.; 35c. doz.

Two Colored (Yellow and White) Varieties.

States General. Clusters of white flowers with citron-colored cups shading to white. Very early. 3 for 10c., or by mail 15c.; 35c. doz.

Glorious. Immense trusses of pure white with primrose colored cups. Very early, splendid to force. 5c. each, 40c. doz.

Grand Monarque. Large white flowers with lemon yellow cup. Can be successfully grown in water like the “Chinese Sacred” mentioned below. 5c. each, 40c. doz.

Double Roman. Clusters of white flowers with double citron colored cups. It is very early and is grown largely for forcing. 3 for 10c., by mail for 15c.; 30c. doz.

White Varieties.

White Pearl True (Louis Le Grand). Large, pure satiny white flowers, exquisite. 5c. each, 50c. doz.

Paper White. Large-Flowered. This new variety is of vigorous growth and early bloom, with immense individual flowers and larger trusses. For forcing or early decorative purposes, and for cut bloom at Christmas, it is invaluable. 3 for 10c., by mail for 15c.; 30c. doz.

Mixed Polyanthus Narcissus. 3 for 10c., by mail for 15c.; 30c. doz.

THE CHINESE SACRED OR ORIENTAL NARCISSUS.

(See cut page 8.)

(A variety of Polyanthus Narcissus.) The Shul Sin Far, or Water Fairy Flower, Joss Flower or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery white with golden yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese, according to their ancient customs, to mark the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring a large growth and immense spikes of flowers: in fact, the incredibly short time required to bring bulbs into bloom (four to five weeks after planting) is one of the wonders of nature. ‘‘You can almost see them grow,’’ succeeding almost everywhere and with everybody. They are doubtless the best type of Oriental bulb and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers through the winter. Price (extra large bulbs), 10c. each, $1.00 doz.; if wanted by mail, add 5c. per bulb, or 40c. per dozen, for postage.

CROcus.

The Crocus is one of the earliest flowers of spring, and occupies a prominent place in every garden. When planted as an edging in triple lines of one or more colors, the effect is striking. No spring display surpasses that of Crocus, the broad, wavy bands of golden-yellow, striped, purple, or pure white, when they expand their blossoms in February and March, are incomparable. In lawns and pleasure parks, planted in the grass, the Crocus is extremely effective.

Crocus in Mixed Colors.

If desired by mail, add for postage at the rate of 15c per 100. Dozens mailed free.

AGAPANTHUS.

The Great African Lily.

(Ready in November.) These are noble ornamentals in pots or tubs for lawns, terraces or plant beds, or for the decoration of the greenhouse. Foliage luxuriant and graceful; flowers borne in clusters of 20 to 30, and measure fully a foot across. The flowers are often used for a long period during the summer and autumn. Add for postage 2c each extra.

ARUM DRACUNCULUS.

Flowers one, foot long, purple, red and black-blue; stem beautifully marbled, leaves handsome, resembling a small palm; a rapid grower, making a curious and ornamental pot plant. 10c each, $1.00 doz. Postage, 2c per bulb extra. (See cut.)

AMARYLLIS.

AMARYLLIS.

Unbellettus. The old favorite; flowers 30c. each, $2.00 doz.

ARUM DRACUNCULUS.

Flowers one foot long, purple, red and black-blue; stem beautifully marbled, leaves handsome, resembling a small palm; a rapid grower, making a curious and ornamental pot plant. 10c each, $1.00 doz. Postage, 2c per bulb extra. (See cut.)

AMARYLLIS.

Formosissima (Jacobean Lily). A quick forcing beautiful flower of grand dark scarlet, free blooming, forces well and can be grown in water like Hyacinthus; if the bulbs are kept dry during winter, they can be planted in the open ground in the spring, and will flower during the summer in 5c. to 10c. doz. Postage, 2c each extra.

Belladonna Major (Bella- donnah Lily). An autumn-blooming variety of extreme beauty and fragrance. The spikes grow from 2 to 3 feet high, each carrying from six to a dozen beautiful flowers “Sweet as Lillies,” of silvery white, flushed and tipped with rose. Extra large bulbs 15c each, $1.00 doz. Postage, 5c per bulb extra.
ASPARAGUS PLUMOSUS NANUS.

The stems of this extremely elegant plant are tufted, slender and gracefully arched. From the upper portions the branches, which are finer than the fronds of the most delicate Fern, spread in all directions. The whole plant is of a bright, cheerful green. It is one of the most distinct and effective decorative plants for the stove or warm conservatory. $1.00 to $2.50 each.

CALLAS.

Black Calla. (Arum Sanctum.) A magnificent and remarkable variety from the Holy Land. The plant produces one flower over the shape of a Calla, but from 14 to 18 inches long and 4 inches broad, and of a rich dark purple color and green underneath, something watery at the borders and curled at the smaller end. The spathes rising from the center of the flower are about ten inches long, velvet-like and quite black. It is raised on a slender but vigorous stalk of brown-red, shading to green at the upper end. The leaves are large and very wavy; of a rich green color, velvety light green, and resemble exactly those of the Calla Ethiopica. The whole plant makes a most stately and elegant appearance. (See cut.) Cultivated and selected bulbs, 30c. each, $2.50 doz.

White Calla, or Lily of the Nile. This old favorite is too well known to require any description. We offer dry roots as they are superior for forcing and winter-flowering purposes; they come into bloom quickly and require less room, making less foliage. Extra large dormant roots, 25c. each, $2.50 doz. First size, 15c. each, $1.50 doz.

Little Gem Calla. Little Gem rarely exceeds 12 inches in height, and blooms most abundantly. The leaves are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. It is in every way superior as a house plant to the large-growing variety. 25c. each, $2.50 doz. (See cut.)

Spotted Leaf Calla. (Richardia Alba Maculata.) This plant is always ornamental, even when not in flower; the dark green leaves being beautifully spotted with white; in other respects the plant is the same as the old favorite white Calla, excepting being of smaller habit. In fact it's advantage to its usefulness as a pot plant it makes a fine thing for planting in the garden in the summer, being very effective. 15c. each, $2.50 doz.

DIELYTRA.

(Bleeding Heart or Lyre Flower.)

One of the most ornamental of spring-flowering plants, with elegant green foliage and long drooping racemes of pink and white heart-shaped flowers. This is deemed one of the finest of all hardy garden plants, and is frequently forced for greenhouse or conservatory decoration. (Ready in November.) 15c. each, $1.50 doz. Add for postage, if desired by mail, 5c. extra per root.

CYCLAMEN.

These are among the most beautiful and interesting winter and spring flowering bulbs for the window and greenhouse. Not only are the flowers of striking beauty, but the foliage is also highly ornamental, consequently they are very decorative, even when not in bloom. There are no plants better adapted for pot culture, and few that produce such a profusion of bloom; the flowers range through many shades, pink, crimson, white, etc., some being beautifully spotted. Most of them are, moreover delicately fragrant. Dry bulbs.

Persicaria, Mixed. 10c. each, $1.00 doz. If by mail add 10c. per doz. for postage. Single bulbs mailed free.

GIANT CYCLAMEN.

The flowers of this magnificent strain are of extraordinary size and of great substance. The leaves are proportionately large and beautiful, marked by purple and 10c. per dozen for postage. Single mailed free.*

Giganteum, Rose Color, Crimson or White. Price for any of these $2.50 doz., or the set of 3 varieties, 65c.

Giganteum, Mixed Varieties. 20c. each, $2.00 doz.

FREESIA.

Refracta Alba. This is one of the most popular and charming bulbs for pot culture, flowering in the winter and spring in the conservatory or window garden. 6 or 8 bulbs should be planted in a 4-inch pot. They force readily and can be had in bloom by Christmas if desired, and by having a dozen or more pots started in the cold frame they can be brought in at intervals, thereby keeping up a continuous display of bloom throughout the winter; the flowers are produced 6 to 8 on stems about 8 inches high, and are particularly useful for cutting, remaining in good condition kept in water for two weeks; the flowers are pure white with a yellow banded throat and are exquisitely fragrant. Extra large bulbs, 2 for 5c., 20c. doz., $1.00 100.

GLADIOLUS.

Early-flowering Hardy Varieties.

(For autumn planting or winter forcing.)

These beautiful Early-flowering Gladiolus are greatly prized on account of their blooming in June and July, if planted in the autumn in dry soil and protected with a covering of about six inches of straw, leaves or litter. If planted in cold frames they will flower as early as May, and this is perhaps the better way in very cold localities. These Gladiolus are also invaluable for flowering in the greenhouse in pots for winter bloom. Millions of them are forced by florists for cut flowers, and for this purpose they are particularly beautiful. The colors and markings are very handsome, and
GLADIOLUS—Continued.

in other varieties soft and delicate; the bulbs can be kept dormant until spring and then planted in open ground if preferred. (Ready in November.)

The Bride. (Colvilley Alba.) Very beautiful; purest white. 2 for 5c., 25c. doz., $2.50 100, or by mail, $3.00.

Mixed Early-Flowering Hardy Gladiolus. 2 for 5c., 25c. doz., $2.50 100, or by mail, $2.95.

GLOXINIAS.

Most charming greenhouse plants, of dwarf habit. Their flowers are produced in greatest profusion—often 3 to 4 inches across—and are of the most exquisite and permanent beauty; many of which are magnificently spotted, mottled and blended. The colors are of the softest shades of pink, rose, purple, white, and theIntermediate shades of many beautiful combinations, lasting for many months. They are also extremely hardy, and are grown in warm frame and shaded from the bright sun, for growing for cut flowers during the summer months. Mixed varieties. (Ready in November.) 15c. each, $1.50 doz.

THE TRUE BERMUDA EASTER LILY.

(Lilium Harrisii.)
The Grandest Winter-Flowering Plant in Cultivation.

Of the Easiest Culture. Blooming in Wonderful Abundance.

This Peerless Lily is the greatest acquisition to the florist trade made in many years. Their profusion of bloom is almost incredible, requiring an ab-\n\n\nA Succesion of Bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals throughout the winter.

The Quantity of Blossoms Produced is Marvelous; the average production of 5 bulbs 5 to 7 in. in circumference, even when forced, is from 5 to 8 flowers, and of bulbs 7 to 9 inches, 8 to 12 flowers; and, if desired, a second crop of flowers, fre-\n\n\nOXALIS—Various Kinds.

Price for Oxalis, except where noted, 2 for 5c., 25c. doz., $1.75 100.
Bowellii. Vivid rosy crimson, large.
Lutea. Splendid large, canary yellow.
Verrucosa. Crimson and white.
Alba. White.
Rosa. Rose.
Lutescet. Lilac. Very deep reddish violet. 5c each, 50c. doz., $3.50 100.

Mixed Oxalis. 2 for 5c., 25c. doz., $1.50 100.

R NITHOGALUM.

Arabianum. (Arabian Star of Bethlehem.) A beautiful variety, throwing up a tall spike bearing numerous large, oval, light-green leaves, with a black center, and having a distinct aromatic perfume. They are decidedly pretty for indoor decoration, and when planted in the garden, are more largely grown for greenhouse and window decoration, being of the easiest culture. Largely forced by florists not for cut flowers. 5c each, 10c. doz., $2.50 100. By mail, 25c. per extra.

SNOWDROPS.

In the early spring months there is nothing more beautiful than a sheet of the snowy, graceful blossoms of the Snowdrop. Beds and effects of surpassing beauty may be arranged with Snowdrops in the center, edged with bright blue Scilla Sibirica, or Chionodoxa Luciliae, or by intermingling them. When practical, such plantings of the Snowdrop should be permanent. The Snowdrop and the Crocus, when planted in alternate circles, are very effective, and follow each other so closely that no gap is left in the succession. In beds of Tulips and Hyacinths, Snowdrops are very effective between the lines; they flower while these bulbs are just coming into the flower piece, and while the bulbs are in the ground there remains an eleg-\n\n\nSPIREA, OR ASTILBE.

Japonica. (Ready in November.) The flowers are borne in large feathery panicles of white, and last a long time in bloom. Large and varied varieties, though a per-\n\n\n
Monstrous Bulbs (4 to 12 in. in circumference) 35c each, $3.50 per doz. (postage free). These Monstrous Bulbs make fine specimen pot plants for exhibition and decoration.

AURATUM.

(See cut.) The Golden Rayed Lily of Japan.) The grandest of all the Lily family. Flowers pure white, with crimson spots, while through various parts of the flower grow in succession of splendid fiery yellow, delicately shaded, to a pure white, one foot across, produced abundance. The flowers measure ear-\n
LILY OF THE VALLEY.

(Ready for delivery in November.) The Lily of the Valley is one of the most useful and greatly admired plants grown; the modest bell-shaped flowers of purest white are highly prized for cutting purposes, and for flowering in pots in the winter they are exceedingly desirable. Be-\n\n

Plants for Conservatories, Plants for Greenhouses, Plants for Window Gardens. Trees for Fruit, Trees for Shade, Hardy Roses, Strawberries and Garden Fruits.

Lower Express Rates on Plants—A Saving of 20 Per Cent.

We are prepared to send plants next week. Under the new ruling of the leading express companies, plants packed in closed boxes or baskets will now be carried at a reduced rate all over the country. This reduction will make the charges at least twenty per cent. less than heretofore.

PALMS.

For description and price, see next page.

We call particular attention to our list of Palms, and venture to say that for the money expended there is nothing we offer which will give more satisfaction to our customers. They are especially grown for window and room culture, and with ordinary care can be kept in perfect condition for years. Our stock of Roses, Carnations, Primroses, Chrysanthemums and other winter-blooming plants is exceptionally fine, and contains only such varieties as are specially adapted for this purpose. In this connection we would say that the variety of plants which will thrive and bloom during the winter months is comparatively limited, and the lack of success which occasionally discourages amateurs is due more frequently to a poor selection of varieties than to mistakes in culture. With this point in view we have carefully selected only such sorts as are adapted for this purpose, so that the most inexperienced amateur is perfectly safe in ordering from this catalogue, from the fact that it contains only such plants as are highly ornamental, either in flower or foliage, during the full, winter, and early spring months. We also offer a range of sizes in nearly everything, thus enabling customers to secure a large plant for immediate effect, or a small one, at a low price, if desired.

Collection of Plants for House Culture.

Many amateurs are often at a loss what plants to select from the great variety offered in a catalogue, and to aid such we offer the following collections. In these collections we send our best plants and finest varieties, and purchasers secure them at less than regular rates, but in every instance the selection must be left to us. These collections embrace all the leading plants suitable for winter-flowering or decorating, all of which may be grown in a light window of sitting room, such as Abutilons, Azaleas, Begonias, Carnations, Chrysanthemums, Camellias, Fuchsias, Geraniums, Heliotropes, Palms, Primulas, Roses, Violets, etc.

Collection No. 1. 12 Plants for $2.25.
Collection No. 2. 25 Plants for $4.00.
Collection No. 3. 50 Plants for $7.00.
Collection No. 4. 100 Plants for $12.00.

Palms and Decorative Plants.

Areca Lutescens. This majestic palm is without a peer for strength and elegance combined. Its dark, glossy green leaves are gracefully curved on slender stems, and the entire foliage is gracefully disposed. The trunk and stems are a golden yellow, irregularly spotted with bronzy green, giving it a peculiar charm. Price, fine plants, 2\text{\ 2}/ 2 to 3 feet high, $8.00 each; strong plants, 1\text{\ 2}/ 2 to 2 feet, $1.00, $1.50 or $2.50 each; plants, 3 in a pot, $1.00 each; 10 to 15 inches high, 75c. each; small plants, 50c. each. Specimen plants, $5.00 each.
Coros Weldiana. This beautiful palm is unquestionably the most elegant and graceful in cultivation. The finely cut leaves are recurved with exquisite grace. It is admirably adapted for the centres of jardinières and fern dishes, as it retains its freshness for a long time, while for dinner-table decoration it is unexcelled. Price, fine plants, 18 to 24 inches high, $2.00 each; 10 to 12 inches high, 75c. each. Smaller plants, 50c. each.

Rubber Plants. We have a splendid stock of this useful and ornamental plant, which will flourish under the most adverse conditions. Price, 50c., $1.00 and $1.50 each, 12 to 15 inches high; large specimen plants from $5.00 to $10.00 each.

Pandanus Utilis. Pandanus is perhaps the most useful of our ornamental foliage plants. As a vase plant or single specimen in greenhouse or conservatory, it cannot be surpassed. It is also largely used to decorate the halls in our finest private residences. Price, fine plants, from four-inch pots, 75c. each; from 5-inch pots, 50c. each.

Pandanus Borneou. (Fan Palm.) This fine Palm is illustrated on the preceding page. It is too well known to need any extended description; its strong constitution and other grand characteristics render it one of the most popular Palms grown. Price, 4-inch pots, 50c. each; 5-inch pots, $1.00 each; 6-inch pots, $2.00 each; 7-inch pots, $3.00 each. Specimen plants, $5.00 each.

Kentia Helmswoana. The Kentias are among the best of the Palm species for general cultivation, being almost impregnable against disease. Has graceful habit, bright green foliage gracefully disposed; as a decorative plant for the window, dinner table or conservatory, it scarcely has an equal. Price, strong plants, 2\text{\ 2}/ 2 to 3 feet high, $3.00 each; second grade, fine plants, $2.00 each; strong plants, 20 to 24 inches high, $1.50 each; second grade, $1.00 each. Plants from 4-inch pots, 75c. each; small plants, 50c. each.

Dracaena Indivisa. All of the plants in use for centres of vases, baskets, and for beds in the open ground, nothing is so valuable as this. From its graceful drooping habit it sometimes is called the 'Fountain Plant.' Price, 50c. and $1.00 each, according to size.

Dracaena Fongrass. One of the finest of our ornamental leafed plants; deep green, broad, gracefully drooping leaves. Price, plants from 6-inch pots, $2.00 each; 4-inch pots, $1.00 each.

Chinese Sacred or Oriental Narcissus. (See description page 5.)
Asparagus Flumosus Nanus. The stems of this extremely elegant plant are tufted, slender and gracefully arched. From the upper portions the branches, which are finer than the fronds of the most delicate Fern, spread in all directions. The whole plant is of a bright, cheerful green. It is one of the most distinct and effective decorative plants for the stove or warm conservatory. 50c., $1.00 and $2.50 each.

Special Offer of Young Palms.

Young Palms are easily grown into splendid specimens, one year's growth increasing their value fourfold, and frequently far more. As an inducement to enter this pleasant and profitable field, we make the following low offer: 1 Areca, 40c.; 1 Kentia, 45c.; 1 Cocos, 40c.; 1 Latania, 35c.; 1 Cary-

OTIA, 40c.; 1 Dracena Indivisa, 35c.; Total Value, $2.35. This collection of five Palms and one Dracena we offer, free by mail, for $1.80. If wanted by express, buyer to pay charges, we can send larger plants and leave all the soil on the roots.

CHINESE AZALIA.

For House Culture.

Few plants reward the cultivator more liberally with wealth of bloom, and no collection of plants however small should be without them. Imagine a plant or perfect little tree in appearance covered with dozens and even hundreds of blooms, and of all shades of red, White and Pink, then you have formed some idea of this plant. The most inexperienced cultivator can grow them.

Miscellaneous Plants for the House.

Our space will not permit us to describe them. Parties wanting description can send for our Spring Catalogue. We name the following as a reminder:

**BEGONIAS.**

**RUBRA.**

A good variety of the flowering sorts, also the Rex. Price from 10c. to 25c. each.

**CARNATIONS.**

Large plants from open ground. Grown expressly for winter bloomers. The following are best adapted and will all flower profusely during winter and spring:

- **Hinzes, white.**
- **President Garfield, Bright scarlet.** Price, 25c. each, $2.50 per dozen.

**HOYA CUMOSA.**

Wax Plant. Nice plants, 2½ inch pots 15c each, 4 inch pots 25c, $2.50 per doz.

**HELIOTROPES.**

- **Strong Plants.** 2½ inch pots 10c each. See spring catalogue for varieties and description.

**IVY.**

- **English.** The well known evergreen climber, hardy. 10 to 25c each.
- **Seneio Scandens.** (German or Parlor Ivy.) Rapid grower. 10c to 25c.
- **Kenilworth Ivy.** (Tinari Cymbalaria.) A neat and delicate plant of trailing habit, violet colored flowers. 10c.

GERANIUMS.

(See cut, page 10.)

We have without doubt the best collection in the south, grown expressly for winter bloomers. Price, from $1.50 to $2.00 per doz. by express only. Small plants from 2½ inch pots, 18, all different, for $1.00, free by mail.

We name a few of the most popular varieties. See our spring catalogue for description:

Terry Leaved Geraniums. Large stock of 4-inch pot plants Good winter bloomers. 25c. each, $2.50 per doz.

**HIBISCUS.** See Spring Catalogue.

ROSES.

The rose is one of our leading specialties. We grow annually many thousand plants of the Tea and Hybrid Tea varieties. We annually discard varieties that prove weak growers or unsatisfactory from other causes. Our customers can rely on the varieties which we catalogue being worthy and something that will please the planter if something really good is wanted.

**HOW TO GROW.** In selecting a spot to plant your roses, choose one where they will have full sunlight all day, if possible, and never near large trees or in shady situations, as the rose delights in a sunny, airy position. Roses are very partial to a clay loam soil, but will do well in any ordinary soil if well enriched with thoroughly rotted manure. In preparing the bed, dig it up thoroughly to the depth of twelve to eighteen inches, as rose roots penetrate deep when they have chance. When you have planted keep the ground loose by frequent stiring to the depth of one or two inches. An occasional soaking with weak manure water is a great help to them, and will make your plants bloom freely and increases the size of the buds.

This set of Roses are priced in small plants only, as they are new and scarce.
New and Scarce Roses.

Kalzerina Augusta Victoria. (Hybrid Tea.) An extra fine white variety, faintly blended with cream color. Very large, with short, flat petals, its color is a combination of Tea and Magnolia, and is very delightfully and distinct from that of any other variety. A free and vigorous grower, with green foliage. Rarely free flowering and an excellent winter bloomer. 25c.

The Rose, "American Belle." A pink colored sport from the "American Beauty" and the grandest acquisition to the Rose family in many years. Raised by Mr. John Burton, of Salem, Ill. It is one of the most successful rose growers in this country, it has created a sensation wherever shown. It is a perfect bloom, and entirely distinct from those of the "American Beauty." The color of the flower is a deep, clear pink, without the slightest tinge of blue, even after being cut for a few days. Instead of turning bluish as the "Beauty" does with age, the "Belle" becomes still more pink as the flowers get older. This characteristic is a most valuable one and makes this rose peculiarly desirable for cutting. In the bud stage the color of the flower is deeper, but as it expands the pink shade becomes pure and distinct, making it a fit companion for the "Beauty." To which beautiful variety it is an auxiliary or companion, and not a competitor. Its fragrant perfume is one of the most delightful fragrances of the "Beauty," the sweetest of any rose known, is also possessed by the "Belle" in an equal degree. The growth of the "Belle" is not quite so strong as the "Beauty," but it is even freer blooming. Its foliage is quite distinct—a fine deep green.

Rainbow. An elegant new and striped Tea Rose of strong healthy growth and exceedingly free flowering habit. The buds are long on strong stiff stems. Color, a beautiful shade of deep pink distinctly striped and mottled with bright crimson, elegantly shaded and toned with rich amber. It makes beautiful buds and flowers of large size, with thick heavy petals, very fragrant. A useful variety for cut flowers. 15c.

Crimson Globe. (Moss.) A beautiful new crimson moss rose, of strong, healthy growth. Flowers large size, globular shape; very double. The handsome flowers are produced in large clusters. Very fine and a decided acquisition to this class of roses. 15c.

Dunmark. (Hybrid Tea.) A strong, vigorous growing variety of the La France type, of which it is one of the most successful. Plant and produces flowers fully as freely, on strong, upright stems. Color, deep rosy peach; very fragrant. 30c.

Bridesmaid. (Tea.) In this exquisitely new rose, we have an improved Catherine Mermet, from which it is a sport. Mermet, on account of its exquisite shape, large solid, firm buds, with long stiff stems, has long been considered one of the best cut flower varieties; its only defect has been that in cloudy weather it becomes a dull dull color. Bridesmaid at all seasons is a clear delicate pink, in all respects a counterpart of Mermet, with large handsome pointed buds on long stiff stems. Will prove one of our most valuable forcing varieties for winter flowers. 25 cents.

Mad. A. Veysset. (Striped La France.) This beautiful new rose combines all the good qualities of La France, from which it is a sport, fragrance, shape of flowers and buds, but it differs from it in two points. First, it is much freer blooming; second, a beautiful bright rose on a satiny pink ground. Very distinct and showy and will become a very popular ever-blooming garden rose. 25c.

Cleanse the Ray. Bright crimson, a Hybrid Tea with Bourbon and Tea. An exceedingly free blooming and strong, vigorous grower, and will certainly prove one of the very best bedding roses yet introduced; it is also a fine variety for winter blooming; though not extra large buds, it produces immense numbers of flowers, exceedingly bright in color, retaining their beauty for weeks after blooming. It has handsome foliage, and is very sweet scented. 30c.

Grand Duchess Adelaide. (Tea.) Pale yellow with white, slightly flushed over; large, semi-double, of cupped form, with large outer petals, 30c.

Grand Duchess Hilda. (Tea.) Plant of moderately free growth. Flowers medium in size with large outer petals. Color, naranje yellow with deeper center. 30c.

Elise Hermospor. (Tea.) Light yellow, shaded with naranje yellow, center rosy peach; very free flowering; an excellent showy grower, and free blooming. 30c.

Triumph de Pernet Pere. Flowers extra large, having broad thick petals and long tapering buds with delicious tea fragrance; yet, like bright red, and sometimes passing to deep crimson, very brilliant and handsome; excellent for bedding and cutting.

Above set of 12 New Roses for $2.75.

A Prize Collection of Winter Blooming Roses.

The collection is selected as being the best adapted for house culture, and contains the cream of the winter blooming roses, and those best suited for growing in pots. Price from 15c. to $2.50 each, except noted otherwise. The prices following the variety are for small plants only from 2½ in. pots.

Plants from open ground 25c each. 50c. per doz., unless otherwise noted.

The Bride. This is decidedly the most beautiful white tea rose. It is a sport from Catharine Mermet, with which it is identical in growth and shape of flowers. The flowers are very large and double, on long, stiff stems, of fine texture. Niphotos. An elegant tea rose, very large and double, deliciously sweet, color pure white, highly valued for its beauty of form and color, 25c. the dozen.

Mad. Pierre Guillot. One of the most showy and attractive tea roses of recent introduction. Large, beautiful, long pointed buds, creamy white, shading to yellow at base of petals. Each petal heavily bordered with white rose very fine flowering. 30c.

Souv. de Wootton. A hybrid tea of strong erect habit of growth. Flowers of deep pink color, every shoot is crowned with one or more buds. Color crimson red, changing to rosy crimson. Very sweet scented. 15c.; open ground, 25c.

Duchess of Albany. This variety is a sport from La France, deeper in color, more expanded in form and larger
in size. The flowers are deep even pink, very large and full, highly perfumed and of first quality in every respect. The growth of the plant is vigorous, habit good, and the flowers are produced in extraordinary profusion, the plants being continually covered with handsome blooms. 15c.; open ground, 50c.

Souvenir d’un Ami. Fine delicate rose, shaded with salmon, very large, full and double, exquisitely fragrant, a vigorous grower and fine bloomer; a rose that should be in every collection.

Meteor. A rich, dark, velvety crimson, ever-blooming rose, as fine in color as the best of the hybrid perpetuals. The flowers are of good size, very double and perfect in shape, either as buds or when fully opened; the plant is vigorous and remarkably free-flowering. A splendid sort for pot culture, and the best of all the hybrid teas as a bedding variety for summer cut flowers, as it retains its color well, even in the hottest weather, with no shade of parrot to mar its beauty. 15c.; open ground, 50c.

Papa Goutier. A magnificent red tea. It is a strong grower, with fine healthy foliage; the buds are large and long, with thick, broad petals of a dark carmine crimson color, changing to a lighter shade in the open flower. An excellent winter-blooming variety, and one of the best for outdoor planting, opening up the flowers in beautiful shape.

Perle des Jardins. Unquestionably the finest yellow rose for either summer or winter flowering. The flowers are very large and double, of perfect form. Color a rich shade of yellow; a healthy, free grower, with beautiful foliage, and unequalled in profusion of bloom. No collection of roses is complete without Perle. Open ground, 85c.

Catherine Mermet. One of the finest roses grown. The buds are very large and globular, the petals being recurved and showing to advantage the lovely bright pink of the center, shading into light creamy pink, reminding one of La France in its silvery shading. A strong grower and fine bloomer. Unless noted, 10c.; the set of 12 varieties for $1.20.

La France. Well-named—perhaps the best rose in existence. "For the few who do not already know, I shall say it is of extra size, extra double and of superb form. No rose can compare it in delicate coloring—silvery rose, shaded with pink; in fragrance it is incomparable; in form perfect. The sweetest and most excellent of all roses."

Mme. Hoste. A beautiful free-flowering tea rose, with extra large flowers and superb bud; very full and highly fragrant. A strong grower, and buds can always be cut with long stems. It is one of the very large flowers, the color is ivory white; in summer a bright canary with amber center.

General List.

Plants from open ground, 25c. each, 50c. 50c. per dozen, except otherwise noted; small plants from 26-inch pots, 10c. each, except where noted. Our selection, 15c. for $1.00, free by mail.

ADAM. Good carmine pink, large and double.

ARCHDUKE CHARLES. Brilliant crimson scarlet, shaded with violet; splendid.

APOLINE. Clear pink, extra fine rose; grows with remarkable vigor.

BUCHELE. Noted for the size and beauty of its buds, which are a rich deep rose, highly esteemed for its rich color and beautifully formed buds; very sweet.

BEAUTY OF STAPLFORD. The flowers are very large, fine form, delicately scented, clear bright pink shading to a bright rosy crimson; makes large and beautiful buds, and is a constant and profuse bloomer. 15c.; open ground, 50c.

BELLA. Pure white, pretty pointed buds, a very handsome rose; should be more generally planted. 15c.

CORNELIA COOK. Beautiful creamy white, buds of immense size and very double.

COMTESSE DE FRIGNEUSE. The buds are long and pointed, not unlike Nephelos in form, and of good size. The color is a deep golden yellow, with a shaded shield of petal. As a yellow rose, this takes rank next to Marechal Niel. 15c.; open ground, 50c.

COMTESSE RIZA DU PARC. A finely formed, highly colored flower, coppery rose, heavily shaded with carmine; fragrant and very fragrant. 15c.; open ground, 50c.

CHARLES ROVOLLI. Pure rose color, soft and pleasing. 15c.

DEVONIEEN (The Magnolia Rose). Beautiful creamy white, with rosy center, large, very full and having a delightfully sweet magnolia fragrance. 15c.; open ground, 50c.

DOUGLASS. Dark cherry red, rich and velvety, large and full.

ETOILE DE LYON. A beautiful chrome yellow, deepening to the center to pure golden yellow; flowers very large, very double and full and deliciously fragrant. It produces magnificent buds.

HERMOSA. The well-known garden rose.

ISABELLA SPRUNT. Bright canary yellow, large and beautiful buds, very sweetly tea scented. 15c.

LOUIS PHILIPPE. Dark velvety crimson.

LA PACTOLE. Creamy yellow center, very free flowering; a beautiful rose.

LA PRINCESSE VERA. Flowers large and full, perfectly double creamy white.

MAD. C. KLUSTER. White orange, yellow center.

MAD. DELACROIX. Beautiful amber-yellow, deepening towards the center to orange or coppery yellow, extra large, fine, globular form, very double and full. 20c.; open ground, 50c.

MAD. FALCOT. Apricot yellow; flower of medium size and fullness, but beautiful in bud.

MAD. RUSSELL. Creamy white, shaded with pink.

Mlle. RACHEL. A lovely tea rose, pale rosy pink, very double and deliciously scented, makes beautiful buds; is an elegant rose for either house or open ground.

MARIE DUCHER. Rich transparent salmon with fawn center; large, double and sweet.

MAD. BREST. A dark rose red, double and large.

MAD. DE ST. JOSEPH. Fawn, shaded salmon; large, full, sweet-scented, fine.

MARIE GUILLOT. Perfection in form, the flower is large
and double to the center, grows well and is healthy, pure white when fully open.

MARIE VAN HOUTTE. Of a lovely pale yellow color, with the outer petals suffused bright pink and the inner ones edged rose: large, full, fine form. 30c. Open ground, 50c.

CLOTHILDE. Pure white, fine buds; a poor grower outdoors, but good for pot culture

PERLE DES JARDINS. The finest and most popular dwarf yellow rose in existence. Flowers canary yellow, often golden yellow: of the most beautiful form, and large. Open gr., 50c.

QUEEN OF BEDFORDS. Very rich, dark velvety crimson, very free blooming, flower compact and full; one of the best crimson bedders; a grand sort. 25c. Open ground, 75c.

SOMBRÉEUL. This magnificent variety has immense finely formed flowers of a beautiful white, tinged with a delicate rose. It is a rich and imposing flower, and has the advantage also of most beautiful foliage, itself very fragrant; especially fine in the fall.

SUNSET. A sport from Perle des Jardins, which it closely resembles, except in color; the color is a remarkable shade of rich golden amber; elegance tinged and shaded with dark, ruddy copper, intensely beautiful: with us has not proved as vigorous a grower as its parent. 25c. Open ground, 50c.

WHITE TEA. Same as White Daisy: pure white; a constant and profuse bloomer, fragrant and desirable.

CLIMBING TEA AND NOISETTE.

ESTELLA PREDEL. Lovely pure white buds, flowers full and sweet.

FORTUNE’S DOUBLE YELLOW. (Beauty of Glazenwood.) Bronze-yellow or copper and fawn color.

GLOIRE DE DIJON. Rich amber and apricot, rose shadings; full and free. 25c each.

JAMES SPRINT. Deep velvety crimson: very double.

LAMARQUE. Flowers of medium size, borne in large clusters; pure white and double. A most beautiful rose.

LILY METCHERSKY. Flowers of a beautiful and profuse, violet-red; vigorous habit and very free-flowering. 15c.

MADAME ALFRED CARRIERE. Extra large, full flowers, very double and sweet. Rich creamy white, faintly tinged with pale yellow; strong grower and free bloomer. 15c.

MADAME TRILLI. Fawu and apricot blooms, very large and free flowering. 25c.

MARECHAL NEIL. A beautiful deep sulphur-yellow, and easily the queen of all roses; in perfect form, unequalled fragrance, and has the advantage of superb foliage and rapid growth. We have three sizes, 15c., 25c., and 50c. Also one year, grafted at $1.00; two years, at $1.50.

MARIE LAVELLEY. Habit extra vigorous; flowers large and of fine form; very rose, shaded and lined with white. This is perhaps the most rampant and vigorous in the whole family of roses. If you want a rose to "get there quick," this is the one to plant. 25c.; open ground, 50c.

MADAME HENRIETTA or RED FLOWERING CLOTHILDE. A strong, vigorous grower; flowers large, full and of fine form; beautiful pure cherry-red, and sweet scented. 15c.

POLYANTHA ROSES.

This is a new dwarf class, with peculiar distinct growth and form of flowers. One shoot bears from six to eight flowers in a cluster or panicule shape. They seem to be perfectly hardy, better natives of Japan.

CLOTHILDE SOUPERT. is now known to thousands of our readers, and by the hundreds of testimonials received, we are led to believe it the most popular ever-blooming rose of today. Its charming coloring, shading from pearly white to purest rose, double blossoms, delightful fragrance, wonderful vigor and freedom of bloom combine to make it the most beautiful rose Price, 25c. each, or five for $1.00. See cut on this page.

PERLE DU DIJON. Orange-red Perle diantha, with yellowish tinge; very free bloomer; an excellent bedder during the summer.

LITTLE PET. About the same size as the above, but with shorter petals and a rather more double flower. As it opens the bud appears of a bluish color, but it is soon seen that this shading is only upon the back of the outer row of petals; the other portion of the rose being white. Compact in growth; very free.

M’ME CECIL BRUNNER. Salmon, heavily shaded rose; sweet and beautiful, and one of the best of this class.

MIGNONETTE. A good grower; flowers exceedingly small, borne in clusters of twenty to thirty; delicate rose, passing to white.

JESSAMINE.

GRAND DUKE. Easily grown; flowers double, creamy white, very fragrant. 15c., 25c., 50c. each.

CATALONIAN. Foliage fine, flowers white, star-shaped, very fragrant; hardy. 5c., 15c., 25c. each.

CAPE. Flowers large, white, very fragrant; foliage rich and glossy. 15c., 25c. to 50c. each.

REVOLTUM. Hardy climber; flowers single, fragrant. 15c.

ORANGE AND LEMON. Small trees. Best budded varieties. 50c. each.

ORANGE. A grand pot plant, one of great beauty and novelty. With one or two plants one can have the beautiful fruits of the far-famed orange blossoms. Small plants, 30c.; large plants, 60c.

CHRYSANTHEMS.

The Chrysanthemum of to-day needs no special write-up. They have found their way into millions of homes and are
CHRYSTHEMUMS—Continued.

pronounced by all to be next, if not equal to the rose. Their blooming season is near at hand, and those of us unsuspecting who have been misled to the belief to glance over this list of varieties, which are all choice, no common ones amongst them. All are in from six to eight inches high, nicely set with bud and blooming. Price, except when noted, from 25c, 50c. and 75c. each. Well packed, express charges paid. We merely name the varieties. For description see our Spring Cata
logue.

AMBER QUEEN. Jap. Soft amber. deeper shadings.

ARNOLD HIX. Jap. Old gold bronze.

ATLANTA MAUVE.

BULLOC, MRS. GEO. Jap. Deep rose.

CLARK, MRS. IRVING. Jap. Pale pink.

CLERKE, MRS. M. Jap. Pure white.

DEAN, MAUD. Jap Rose pink.

DENNIE, MRS. A. J. Crimson lake.

ETOILE DE LYON. Jap. White, striped purple or violet.

EXCELLENT. Jap. Soft pink.

FOTTLER, MRS. Jap. Delicate Pink.

GOLDEN GATE. Jap. Old gold and buff; early.

GOLDEN ROSE. Jap. Yellow; early.

GRAND JAP. Jap. Pure white.

HARDY MRS., ALPHIE. Jap. Pure white, flaky crimson.

HILL, JOEY. Jap. Deep cardinal, red-faced old gold.

JEFFERSON, MRS. Jap. Amber.

JESSICA. Jap. White; early.

KIRA. Jap. Pink.

KING'S DAUGHTER. Jap. Pure white.

KRIEG, C. Jap. Pink.

LA PERLE DE SALES. Jap. White striped rose.

LLOYD, MRS. G. Deep red and bronze.

MAY, MRS. JOHN N. Jap. Old gold, veined red.

PRINCESS OF CHRYSTHEMUMS. Delicate shrimp pink.

ROBINSON, MRS. B. N. Jap. Pink and white.

RUD, W. N. Jap. Lavender Pink.

RUSSELL, LILLIAN. Jap. Pink.

SAVAGE, GEORGE. Jap. White.

SEYKO, N. M. JOE. Rosy purple.

SIMPSON, MRS. MARIA. Jap. Old gold.

SOURCE D'OR. Jap. Red and yellow.

SWEET LAVENDER. Jap. White shaded lavender.

THOMPSON, FRANK. Jap. Pearly pink.

THOMPSON, MRS. FRANK. Jap. Lilac pink, Silvery reverse.

VIVIAN. Jap. Pink.

WHEELER, MRS. CHARLES. Jap. Crimson, old gold reverse.

WHITE, JOSEPH H. Jap. Cream white.

WILCOX, FRANK. Amber.

WOODS, ANNA. Jap. Rose magenta.

FRUIT TREES.

Our people know the value of an orchard, and many have availed themselves of this luxury; but many have listened to the crocker, who has always been ready to tell you that orchards will not pay in Texas. Do not listen to such advice, for it is a fact that orchards have paid better in Texas than any crop that can be planted. Of course you cannot expect Eastern and Northern varieties to grow and thrive here; neither would you expect your trees to fruit in our region.

The best varieties for Texas, are as follows: 1. The peach, 2. The plum, 3. The apricot, 4. The grape, 5. The persimmon. Each of these varieties will bear fruit if the tree is properly looked after.

Do not plant corn or any grain small in an orchard.

Soil and Location for an Orchard.

Any good soil that will grow corn or cotton will do for an orchard. The best orchard is on clay land, though rough, will grow good apples and pears, peaches and plums. Grapes will grow on any rich land if the same is well drained; higher land is more suitable. It is the more certain you can be of a crop. Never select a low, sheltered place, as the fruit is more often killed by late frosts. The high, open country is best, where several peaches, apricot and grape; our timbered region is best for the apple, pear, persimmon and the strawberry.

Never select a low, sheltered place, as the fruit is more often killed by late frosts. The high, open country is best, where several peaches, apricot and grape; our timbered region is best for the apple, pear, persimmon and the strawberry.

Directions for Planting.

Nothing is more important than proper preparation and planting of trees. Large holes must be dug, large enough to receive the roots without cramping; and we will say right here that this rule applies to everything—shrub, plant and tree—all must have a large hole, so the roots can be spread out naturally; this is the first step and an all-important one. Set your tree at least two inches deeper than it stood in the nursery; use well pulverized soil around the root; shake the tree so as to settle the dirt around the roots; when the hole is half filled with dirt pour in a bucket of water; fill the hole up with dirt, leaving it basin-shaped so the rains will settle to the tree. Another very important part of planting is that when the tree is set the top should lean to the southwest at an angle of at least forty-five degrees; this will be found a splendid preventative against crooked trees. We have all noticed that our prevailing winds are from the southwest, the afternoon sun, which also damages our trees, is prevented from reaching the trunks if planted at this angle. We contend that the sun kills more trees by coming in contact with the body of the trees than any other cause from which trees die. We often hear people say "the borers killed my peach tree" or "my pear," and when, if the cause was known, the tree was in a manner dead before Mr. Borer got there. My friends, it is the sun beaming on the unprotected trunks of your trees that is doing the damage. Look to it.

Cultivation and Pruning of Trees.

Good cultivation is essential in growing any crop. You would not expect to raise a crop of wheat, corn or cotton unless you cultivate the ground; neither can you grow a good orchard unless you cultivate well. It is frequent plowing and hoeing that makes the orchard pay, just as it makes the farm pay. The very best thing to do is: Plow the orchard well in the spring, break all the ground, and in the small spaces left around the trees take the hoe and pulverize the ground. Then broadcast with stock peat—there is nothing so good; in case you cannot do this, plant it to melons or sweet potatoes. Do not plant corn or any grain small in an orchard.

Pruning should be done when the tree is first planted. Branches should be pruned to a smooth cane cut to two and one-half feet; it will branch and make a handsome-shaped top. Do not allow more than five branches to remain coming from the main stock of the tree; rub off all other branches. Your pruning from this on should be done whenever you see a branch that is out of place. Do not think you cannot do your own pruning; for you can cut off any branch that is not where it should be. Head in your trees each spring by cutting off the ends of the branches; this keeps your trees low
FRUIT TREES—Continued.

and maintains nice round tops. Do not let your trees grow just as they please—have them for ornaments as well as for fruit.

Peaches.

Peaches are recognized by all as the leading fruit for Texas, hence we sell more peaches than all other fruits combined. There will be no other fruit grown in Texas in as many years as the peaches. The best weather we have had is the red river, from Arkansas to New Mexico, and everybody who can have an orchard should have a peach orchard.

Price of fine trees, unless otherwise noted, 15c. each; $1.50 per dozen, $15.00 per hundred.

Above medium; highly colored; flesh greenish-white, very juicy, vinous and of good quality; matures from May 25 to June 10 in Fort Worth. Many varieties have been grown under this name. This is not the Alexander, but so far none have proved superior to it, and it holds its own for pitting and keeping qualities.

AMSDEN. Same as Alexander. Tree an upright grower and sure bearer.

AMELIA. Very large, conical; white, nearly covered with crimson; flesh white, melting, juicy, sweet, rich, vinous and of unsurpassed flavor; freestone. Ripens July 1 to 10.

COLUMBIA. Very large; skin downy, dingy yellow; juicy and rich. Ripens about July 20, and continues for a month.

CRAWFORD'S EARLY. Large; yellow, with red cheek; flesh yellow, juicy and rich; very productive; a standard market variety, and everywhere a success. July 1 to 10.

CRAWFORD'S LATE. Large; yellow, with red cheek; flesh dark mottled red cheek. One of the very best market peaches. July 20 to 30. 6c.

DUFF'S YELLOW. Very large; yellow, with red cheek; flesh yellow, mellow, juicy, bearing an inch and one-fourth in circumference. Usually a shy bearer, but of superior richness and flavor.

ELBERTA. Large; yellow, with red cheek; flesh yellow, melting, very juicy, and rich. Ripens July 1 to 10.

H-multietta. Large; skin creamy white, very seldom any red; flesh pure white to the stone, juicy, sweet and of good aroma. Last of August.

HENRIETTA. Large; yellow, crimson cheek; showy; very productive; clingstone.

HEATH CLINT. Large; skin creamy white, very seldom any red; flesh pure white to the stone, juicy, sweet and of good aroma. Last of August.

OLDMIXON CLING. Large; oblong; white, with pink cheek; a bearer.

OLDMIXON FREE. Large; creamy white, red cheek; flesh firm, juicy and well flavored. Last of July.

PAULINE. Large; skin creamy white; roundish; skin creamy yellow; flesh deep yellow, juicy, melting, rich. A valuable, late peach for market. About September 1.

PLUM. Large; skin creamy white, with pale blush on one side; juicy and of good quality. Last of September.

STONEWALL JACKSON, Almost similar to General Lee in size and quality, but a week later, and tree a more compact grower; Cling; July 20 to 30.

STUMP THE WORLD. Large; white, with bright red cheek; flesh white, juicy and of good flavor; stands carriage well, and is a very fine market variety. July 20.

SUSUEHANNA. Large; skin yellow, with red cheek; flesh yellow, juicy and high flavored. Last of July.

THURBER. A seedling of the Chinese Cling. Originated by Mr. F. E. Berckmans of Georgia, who claims for it all the good qualities of the parent, with the additional merit of being a free bearer. End of June. When grown in a good locality, the fruit is large, full, firm, and of choice quality. Rivets July 1 to 10.

WILLIAM. A seedling of choice selections of Hall's Early. Large; some days earlier than Alexander, which it resembles in tree and fruit. 25c. each, $2.50 per dozen.

WONDER'S LARGE. Large; very large, best specimens sometimes measuring 11 inches in circumference and weighing as many ounces. Smooth, almost globular, very uniform in size and shape; rich yellow skin; flesh yellow, high flavored, firm, 25c. each, $2.50 per dozen.

WHEATLAND. Very large; yellow, with crimson cheek; flesh yellow, good quality; freestone. 25c. each, $2.50 per dozen.

Apples.

Apples do well in all parts of Texas. They thrive best under irrigation, and are popular for sale with the day laborers. They also do well in bottom lands, where the pecan timber grows, or on rough points, especially if the ground shows signs of iron cappings. Our trees are grown, trained, and straightened, and grown on whole roots.

Price, two-year-old trees, 15c. each; $1.50 per dozen, $15.00 per hundred.

ARKANSAS BLACK. Large; dark red, nearly black; fine flavored, with a large, round, stone. Ripens August 20.

BEN DAVIS. Large; greenish yellow, with crimson cheek; delicious flavor. December to March.

GRIME'S GOLDEN. Large; yellow; of the best quality. Tree hardy, vigorous, productive.

HOLY HALE. Large; yellow; tender; juicy; can be cooked long before it is ripe. June.

KILLY MAY. Small; greenish yellow. First of all to ripen.

FALL PIPPIN. Large; green, subacid, quality best. August 1 to 10.

JONATHAN. Fruit medium or small, roundish; skin yellow, nearly covered with dark or lively red; fine grained, very tender and melting-flave fruit is produced in clusters; very much in color, flavor and keeping qualities; vigorous. December to March.

LUMBER TWIG. Large; red, subacid, good flavor.

STUMP. Large; red, subacid, good flavor.

EARLY CLING. Large; yellow, with numerous gray dots; very handsome and of fair quality; an early and very abundant bearer, and a profitable orchard fruit. December to March.

NICK-A-JACK. Vigorous, abundant; striped; large; very good, market; small; ripens early October.

REDDING. Medium; conical; deep red; juicy; productive. June.

RED ASTRACHAN. Large; crisp, acid, beautiful. June 1 to 10.

ROSE BEAUTY. Large; yellow and bright red; handsome; medium quality; a moderate grower; good bear.

ROSE WINTER. Large; yellow; tender; very good. December to March.

STONEY CUMBERLAND. Large; subacid, good quality; freestone. December to March.

WINTER PEARMAIN. Large; firm, soft, juicy, delicious. December to March.

YORK. Vigorous, abundant; striped; large; good, market; small; ripens early October.

PEACHES.

PEACHES—Continued.

matured in Minnesota. Earlier and far better variety of crab apple than the Transcendent. Very ornamental as well as a fine fruit. Bears from 2 to 5 dozen early to jellies. May 15 to 25.

TETOSKY. A Russian apple; medium size, with a yellow ground, handsomely striped with red and covered with a thick bluish bloom; very rigid; a very early variety. May to September.

TRANSIENT. Tree productive; fruit from 1 1/2 to 2 inches in diameter; excellent for sauce and pies, and is also a good apple. Skin yellow, striped with red; flesh white, firm and an early bearer. This is one of the best of the early varieties, and gives a fruit with flesh of a creamy yellow, subacid and aromatic until fully mellow, when it is pleasant and agreeable. Ripen in August and September.
FRUIT TREES—Continued.

WHITNEY'S SEEDLING SIBERIAN. Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, striped and splashed with carmine; flesh firm, juicy and rich. A great bearer and very hardy. Tree a vigorous, handsome grower, with dark green, glossy foliage. This is one of the very best varieties known, and is grown very largely in Illinois.

Pears and Pear Culture for Profit in Texas.

We have always contended that people should turn their attention to pear growing in Texas. We have never had any doubt about the result. Now the fact is known that large profits are being made by those who, when fortunate enough to have bearing orchards, don't say Texas cannot grow just as good fruit as California, for it is not a fact; our pears are as good, the trees are as healthy, and the prices realized for fruit are better than those realized by California growers. Don't wait for your neighbor to make a start, but plant a small pear orchard this fall. Select the varieties marked *, as they have merit and will bear very young.

Prices, except when noted. $5.00 each, $2.50 per dozen, $25 per hundred.

*BARTLETT. Large; buty- 

ery, melting, rich flavor; 

very popular.

*BÉCHERDÉ. 

ANJOU. Large; 

juicy, melting. 

Sept.

LE CONTE. Fruit large, pyriform; skin smooth, pale 

yellow; quality very variable; mature in September. 

It is not a profitable variety, but if allowed to mature slowly in a cool, dark room or in drawers, its quality improves remarkably. Maturity from July 20 to end of August. The tree is of good form, with dense and luxuriant foliage: hardy everywhere, but of the greatest value south. Trees planted from four years old, and should be planted at least 20 feet apart. On account of its productiveness and fine market qualities, the Le Conte is more extensively planted than any other pear, and there is no doubt whatever that its extensive planting will prove very remunerative. Trees, 4 to 6 feet, 30c. each, $2.25 per dozen, $18.00 per 100.

NEWER VARIETIES OF PEARS.

Within the last ten years there has been introduced a large number of new pears, of which the following list comprises the very best. Every one of these is supposed to be a decided acquisi-

*tion.

*JEFFERSON. The earliest pear known. 50c. each.

EARLY HARVEST. Large; 

yellow; melting; fair.

*GARBER HYBRID. Resem- 

bles Keiffer in size, appearance and quality. Maturity, October. Tree of more open growth than Keiffer 50c. each.

*SMITH HYBRID. Almost identical with Le Conte in size, shape and quality, but perhaps a little earlier. 50c. each.

LAWSON, or COMET. A showy variety; rich yellow, 

low and crimson; of second qual-

ity, but profitable for market on account of its earliness and hand-

some appearance. 50c. each.

*IDAHO. Tree is being 

raised from the seed of a large, 

red-checked, p e a r (name un-

known), of Mrs. H. H. Law-

ton, Idaho, who planted the seed about twenty years ago. The tree 

fruited the fourth year from the 

seed, and has borne annually ever since, seeming to be entirely 

tardy. The trees are upright and vigorous in habit, and 

bear a dark foliage. The fruit 

is evenly distributed over the 

tree, sometimes in large clusters. The combined weight of a cluster of four was 81/2 ounces, the largest specimen weighing 28 ozs. From the appearance of the fruit, its peculiar, distinct aroma and thick, firm, leathery foliage, we are led to believe the Idaho to be a descendant of Contee and pears. In size it is of the largest, as large as the large Keiffer pear; the color is greenish yellow, with russety spots; the form is roundish or obovate; the aroma is distinct and pleasant; the flesh is melting, juicy, entirely free from gritty texture; the flavor is good, rich, sprightly, vi-

nous; the core is exceedingly small and without seeds. It is 

sured one of the most valuable introduc-

Plums.

More attention should be given to plum culture in this State. All of the European and many of the American varie-

ties are failures here on account of the natural, but still, by carefully selecting the proper kinds, we always have plenty of plums in our orchard from May till September. Our experi-

cence in raising plums for market has been very gratifying, notwithstanding the fact that about three-fourths of the varieties we plant prove to be of no value. Eight years ago we planted out twenty or more varieties of plums in our orchard. Some varieties have never set a single bear occasionally; some bear fully, but the fruit is destroyed by 

rot or curculio, while a few bear full crops every year. The 

Robinson and Eggle plums are the two most promising kinds, and have been literally loaded every year since. Likewise, the De Soto and Golden Beauty have never failed, though they did not commence bearing so young. We are still experi-

ting with new varieties and hope to be able next season to recommend a larger list next season. Many of the Japanese
FRUIT TREES—Continued.

Price. 25c. each, $2.50 per dozen.

Apricots.

The only drawback to successful apricot culture in Texas is their tendency to bloom too early, and thus get killed by late frosts. They should be planted on high hills and other cold localities, or on long slopes, or in cities where they will be protected from late frosts. In the Panhandle of Texas they bear as regularly as the peach. There are also a number of trees in the city of Fort Worth, in sheltered places, that have borne good crops for several years in succession. Makes a good shade and ornamental tree, being an object of great beauty, especially when in bloom.

Price. 25c. each, $2.50 per dozen.

Mulberries.

Mulberry trees are desirable for shade on account of their hardiness and rapid growth, and are highly prized by many people for pies, etc., as well as for eating "out of hand." The white mulberry is the best for long distances. Profitable also for chickens, hogs, etc.

HICK'S EVERBEARING. A handsome, upright and rapid grower; very abundant and continuous bearer. 25c. each, $2.50 per dozen.

RUSSIAN. Very hardy, and extremely prolific; fruit of medium quality. 25c. each.

MULTICULIS. Non-bearing; the leaves are food for the silkworm, and for this purpose the variety has been largely planted. 25c. each.

Japanese Persimmons.

(Diospyros Kaki.)

Price. $1.00 each, $10 per dozen.

Quinces.

Quinces have not been extensively planted in Texas, but yet the finest, probably, in the world, are raised at El Paso and other places along the Colorado River. One apiece is larger than the size of an apple. Figs, persimmons, and apricots are recommended as a top dressing about the roots of this fruit tree. The Quince's greatest enemy is the borer, which must be diligently destroyed. Price. 25c. each, $3.50 per dozen.

NU-T-BEARING TREES.

SOFT-SHELL ALMOND. In appearance the Almond tree, leaf and flower, resembles the peach, to which it is closely allied. Not a sure bearer on account of its early blooming. 25c. each, $2.50 per dozen.

HARD-SHELL ALMOND. A more certain bearer than above. 25c. each.

CHESTNUT. Good both as a fruit tree and shade tree. 50c. each, $5.00 per dozen.

ENGLISH WALNUT. The common thin-shelled walnut of commerical value. 25c. each.

AMERICAN BLACK WALNUT. The well-known native Walnut. 25c. each.

PECAN. Trees grown from extra large nuts. 50c. each.

SMALL FRUITS.

Gooseberries and Raspberries.

These are classed among the uncertain fruits for Texas. They can be grown and the crop again and again bear the same amount of fruit, but this year they have certainly scored a success in the South as a practicable and profitabie market fruit. It ripens from the first to the last of August.
SMALL FRUITS—Continued.

Strawberries.

Strawberries will succeed well in almost any good garden soil, and should be planted by every one owning a garden. For field culture plant 1 foot apart in rows and 3 feet between the rows. For the garden the rows need be but 2 feet apart. Pinch off all runners in spring and summer. Mulch in summer.

Price. 75c. per 100, $5.00 per 1000.

Crescent Seedling, Wilson's Alphonso, Elbert, and Michel's Early. These are varieties which will be found reliable all the time, and under good culture will produce especially fine results.

Blackberries.

The blackberry is a profitable fruit to cultivate, grows in any good soil, bears the second year, and yields $300 to $400 profit per acre. Cut the canes in March, cut off the top of the plant and bury the root entirely under ground. New shoots will soon sprout up. The fruit comes on the previous year's growth. After fruiting the canes die, and all dead wood should be removed yearly. The more brambles, the more fruit. When the young canes are 4 or 5 feet high, pinch off the tops to induce growth of side branches.

Price. 75c. per dozen, $4.00 per 100.

Dallas. A native of Texas, and a week or 10 days earlier than the Kittatinny; large, round, juicy, sweet; very productive.

Kittatinny. Very large, sweet and productive. This and the Dallas blackberry give a succession of fruit for 6 to 8 weeks.

We can furnish other varieties, but we regard the above two as so superior to all others that we do not quote more.

Dewberries.

The dewberry is native to most parts of Texas, and is known well. It is greatly improved in size, productiveness and flavor by cultivation.

May. Improved. Probably a hybrid with the blackberry, as the plant is a strong, erect grower. Remarkable for its productiveness, size, beauty, flavor and earliness.

Price, $1.00 per dozen, $5.00 per 100.

Asparagus.

Roots of this valuable vegetable can be supplied, two years old, ready for immediate setting. A bed of asparagus is a most valuable adjunct to any home place, and if grown to any extent is quite profitable.

Price, 25c. per dozen, $1.50 per 100.

Rhubarb, or Pie Plant.

This deserves to be ranked among the best early fruits in the garden. It affords the earliest material for pies and tarts, contains large quantities of sugar, is valuable for cylinder, make the border very rich and deep.

Price, 10c. each, $1.00 per dozen.

Horse Radish.

A useful esculent root. Large clumps 15c. each, $1.50 per dozen.

Grapes.

Grape culture in Texas is receiving more attention of late years than formerly. Since the people have learned what varieties to plant there has been little or no complaint of failure. They grow and bear on almost any kind of soil, though a sandy loam seems to suit them best. Remember that grapes, like everything else, must be cultivated. You need never expect to have good fruit of any kind without cultivation. The grapes given must be well pruned in winter; this must not be neglected. The majority of amateurs are afraid to cut their vines enough. In pruning all weak shoots and vines should be cut off entirely from the main stem, and the strong young canes of the previous season's growth allowed to remain; these, too, must be cut back to within 6 to 10 inches of the old wood. All that remains of a grape vine after being properly pruned is one or two bare stems about five feet high, and on these six to a dozen apiece to 6 to 10 inches long. In fact, nearly the whole vine has been cut away. This is all there is in the art of grape pruning, and any one can learn it in five minutes. Still, the majority of people fail to prune their vines, and are necessarily disappointed. Our vines are very large and fine this year.

It will be seen that our list of grapes is short. Yet if we were to restrict it to profitable market varieties, it would be still shorter. Champion, Ives, Wilson's Alphonso, Elbert, Kittatinny, and Michel's Early, and Davis, are the only kinds grown with much profit. We think, however, that if the Bullander were better known, it would pay better than those named above. The varieties mentioned, except the Delaware, are extremely hardy and prolific. We shall be pleased to correspond with parties contemplating putting out large vineyards. Our well-grown one-year-old vines are larger and better than many of the two-year-old vines from the North, and the prices given below are for these. We can supply a very large two-year vines of Black Spanish, Champion, Delaware, and Bullander at double the price of the one-year vines.

Price, except where noted, 15c each, $5.00 per dozen, $7.00 100. Write for special low prices on large lots.

Agawam. Red; bunches large; berries very large, of a peculiar aromatic flavor; pulp soft; a very vigorous grape of the Rogers class.

Black Spanish. Large, black, very hardy, productive; a good arbor grape. 10c. each, $1.00 per dozen.

Brighton. Bunches medium; berries large, reddish, skin thin; quality best; an excellent early table or market variety; vigorous.

Catawba. Red, late, good, large; sweet, rich, musky flavor; extensively grown North.

Champion. Black; bunches medium; berries large; early and productive. 10c. each.

Clinton. Bunches medium; berries above medium, black, vinous and very refreshing. Ripe middle of July; a rampant grower and a most profuse bearer; makes a delicious claret. 15c. each, $1.00 per dozen.

Concord. Has long been the standard variety on account of its extreme hardiness, productiveness and adaptability to almost any soil, climate and condition; large black; good for table, market or wine. 10c. each, 75c per doz., $5.00 per 100.

Delaware. Bunches small, compact, sheltered; berries small, round, light red; exceedingly sweet, sprightly and vinous. One of the very best table or market grapes, and generally esteemed as the standard of quality among native grapes.

El Paso, or Mission. Medium, dark red, long cluster, very sweet. Very popular in the West and Southwest.

Goethe. Bunch medium to large; berries large, oblong, yellowish green; reliable; very good.

Herbemont. Bunch large, long, shouldered and compact; berries small, black, sweet juicy; highly flavored. Fine wine grape.

Ives' Seedling. Bunches and berries medium, often shouldered; black when fully ripe; very early. This and the Champion are the earliest and most popular market grapes grown here. 10c. each, $1.00 per dozen.

Niagara. White; bunch and berry large; very showy and almost hardy and productive as the Concord; a superb white grape, and one of the most profitable grown.

Radblander, or St. Genevieve. Bunch small, very compact; berries small, reddish purple, very sweet; of fine quality; an excellent wine grape; vine a compact and short-jointed grower. This will be extensively planted when it is better known, as it is as good-flavored as the Delaware and as hardy and productive as the Black Spanish. This is certainly very high praise to give to any grape, but after growing it several years we feel that we cannot praise it too highly. 20c. each, $2.00 per dozen.

Triumph. White; bunch and berry very large; quality good; successful in the South, and therefore the variety to plant.
SHADE TREES.

Anticipating the present great demand for shade trees in Texas, and placing, as they have done several years ago, so many large and handsome shade trees wherever they plant them. Umbrella Chinas, Syca- mores, mulberries, Elms and Catalpas will grow anywhere, with the well-known Maple, Box Elders, Ashes, etc., can be grown into as handsome trees as in any country. A people of intelligence like ours, who by industry and the rapid growth of the country are accumulating wealth, desire to use the good that a kind Providence has placed at the disposal of man as a means to the refinement of themselves and their families.

And, viewing it from our standpoint, there is no greater influence in nature than that imparted in the cultivation of the beautiful in trees, shrub and flower. The beauty of children are more closely bound to the sweet and pure delights of the world if that home is surrounded by trees and shrubbery and well-planted flowers. Contrast such a home with the 8c. where the bare walls and barren yard invite the searching rays of the summer sun to scorched and almost blind, and the bleak winds of winter to shriek and howl about the house, with no friendly trees to raise their arms in mute protection. A tree of almost any kind is a beautiful object; an ample and well-managed wild orchard, in a cultivated state, invariably excites our admiration; a group of trees is still more interesting. In planting ornamental trees there is opportunity for the display of much skill and taste, but without much experience or a cultivated taste in tree planting, one can seldom go so far astray in the hands of the man that nature itself will not, by the efforts of a few years' growth, harmonize incongruities, modify false groupings and mold all into a scene of beauty. The almost sure opportunity to plant trees is seldom absent, and by the practice of it we benefit ourselves and others for the present and in the future.

Read what we say about the cultivation of fruit trees. It is just as necessary to cultivate shade trees as it is to grow any other fruit trees. If care and time are given, prices on trees delivered in your own town, and guaranteed in good condition, can be had to advantage in price of shade trees. If they can be shipped by freight, we can furnish them much cheaper.

Cottonwood. A rapid grower, and so often killed by boxers that it is going out of favor as a shade tree. 25c. each; large trees, 30c. to $1.00 each.$

Catalpa. The best tree to plant on sidewalks or other exposed localities. Horses and cattle will not touch it. It is best described by J. C. Texas, of Missouri, who has for years been making a specialty of Catalpas. He says, 'The trees that have been suggested as adapted to the formation of timber plantations, the Catalpa speciosa stands pre- eminent. Its exceedingly rapid growth, and its ability to live almost all soils and situations, its wide range of latitude, ex- treme hardiness and ability to bear the extremes of Nature, Mexico, the ease and cer- tainty with which it is transplanted, its strong vitality and freedom from insects, the incomparable value of its timber, the almost imperishable nature of the wood when used for posts, railroad crossties and other exposed situations, to say nothing of the handsome and stately appearance of the tree, all point to Catalpa speciosa as the best plant to carry a stock of fine trees.

** Elm, White. The elm has proved very successful in Texas as a shade tree. It is very much more extensively planted than formerly. Like the China, it grows well in rocky soil, where most other trees would decrease or die, and grows, thus being young, vigorous, straight, upright, and well-rooted. Stately, unbranched and long-lived trees are the result of proper planting of the elm.

It is 10 to 12 feet, each $2.50. Each Dozen Price, 10 to 12 feet $25.00 $5.00

Locust, Black. This well-known tree is a good grower and very hardy. We particularly recommend this for West Texas and for sidewalks in cities, or any place where the tree is likely to be neglected.

Dozen Price, transplanted trees, 12 feet $20.00 $5.00

Locust, Purple. The purple-leaf or Vale locust is a very handsome tree. It thrives in the most unfavorable climates and will flourish best in the driest and poorest of soils. We have a good stock of these trees.

Dozen Price, transplanted trees, 12 feet $20.00 $5.00

Locust, Red. This is a very handsome tree. It is a good grower and thrives in the driest and poorest of soils.

Dozen Price, transplanted trees, 12 feet $20.00 $5.00

Locust, Mulberry. We wish, however, to call special attention here to the value of the Hicks and Russian mulberry as a shade tree. The Hicks mulberry makes a handsome and permanent tree. It grows readily from the graft stock, and in two or three years is a large tree.

Each Dozen Price, 5 to 7 feet $23.00 $2.50

Umbrella Peach, Dwarf. Low, bushy and compact in its growth; rich, glossy, dark green foliage. 25c. each.

Umbrella Peach, Blood-leaf. Leaves bright blood red. Quite a popular and useful tree.

Each Dozen Price, 10 feet $12.00 $5.00

Poplar. Tree as erect and symmetrical in its growth as a Lombardy poplar. 25c. each.

Prunus Pissardii. A blood-leaf plum. 25c.

Poplar, Lombardy. Very rapid, upright grower; cannot be excelled as a handsome avenue tree, its striking appearance and beauty rendering it very desirable as a decorative feature.

Each Dozen Price, 10 feet $15.00 $5.00

Poplar, Silver. Beautiful silvery foliage; good grower. 25c. each; larger trees, less.

Sycamore. This is one of the most popular shade trees for all purposes; a sure and rapid grower, and possessing a long life and a handsome appearance.

Each Dozen Price, 10 to 12 feet $0.90 $1.00

Soft Maple. With many people the favorite shade tree for this climate. If cultivated for a few years it makes a rapid growth, which can hardly be equaled by any other tree for the freshness of its foliage and its beautiful appearance. It thrives best in sandy soil, though with a little care will grow readily in black soil. It is the well-known and popular 'Silver Maple of the North.'

Each Dozen Price, 12 feet $0.75 $0.75

Umbrella China. For quick, useful shade no tree equals the Umbrella China. The native of Texas, it is especially adapted to our peculiar climate and soils; it grows well on black land, sandy ground, or almost any kind of soil; esteemed as an umbrella. Sometimes lives to the age of 25 or 26 years, but more frequently dies, or rather breaks to pieces, after 8 or 10 years. For this reason it should not be depended on for permanent shade. A good plan is to plant Chinas alternately 15 feet, with Quercus, Ulmus, Maple; the Chinas can, after a few years, be cut in, and so make a good shade, after the first year, for 8 or 10 years; by that time the other trees will be large enough for shade.

Each Dozen Price, 7 feet, branched $0.50 $0.50

Each Dozen Price, 4 to 5 feet $0.25 $0.25

Each Dozen Price, 2 to 3 feet $0.10 $0.10

Large seedlings are $2.00 to each

Willow, Weeping. Well known, of beautiful, drooping habit. 25c. each; 50c. per dozen; large trees, 50c. to $2 each.

Willow, King-leaf. Rapid and upright grower; leaves peculiarly curled, like a ring; very interesting. 50c. each.
FLOWERING SHRUBS.

Since tea roses and other ever-blooming flowers have been sold so cheaply, there has been a rapid falling off in the demand for hardy flowering shrubs. This is due to the fact that many shrubs, blooming but once a year, are not considered worthy of the space they occupy in a small garden when other flowers would produce more show. But where the grounds are large enough these old favorites should have a place. Everybody should have the Cytisus Japanica, because it brightens the garden with its gay blossoms so early in the season, often in January. Then the lilac and spire (bridal wreath) can never be left out—they are so early and showy; while the calycanthus, snowbush and hydrangeas, though requiring a little more attention than others, are too grand to be overlooked. The deutzia and weigela, not quite so well known, will please everybody. But the shrubs that we would heartily recommend to everybody, no matter how small the grounds, are the althea and crape myrtle. Commencing in May or June, they bloom on continually until frost—just the time of year when flowers are scarcest. We find the semidouble pink althea elegantissimá the showiest and freest bloomer of them all. The crape myrtle is par excellence the shrub for the South. The white is the prettiest and most daintily looking, but the crimson is the showiest, grandest and hardest of all. The purple and pink are not so pretty. Price, except where noted, 25c. each, $2.50 per dozen.

Altheas, Hardy and very free flowering; will bloom continually from June until frost. Double White, Double Purple and Semi-Double Pink.

Almond, Double Pink. A beautiful little shrub, blooming very early in the spring.

Barberry, Purple-leaved. A very ornamental shrub for flowers, leaves and berries. It sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers, which are succeeded by brilliant scarlet berries, nearly an inch long, every branch being loaded with them; the contrast between the glossy, dark green foliage and shining scarlet fruit is extremely beautiful. It continues blooming and bearing berries throughout the entire winter; it may stand all kind of weather and is hardy in any soil; in fact, nature has given it all the essentials for wide popularity. Price, first size, extra strong two-year-old plants, 50c. each, $4.50 per dozen; young plants (which will bloom and fruit abundantly this year), 25c. each, $2.25 per doz.

Arbor Vitae, White, Double flowering and exceedingly handsome variety; flowers white, tinged rose. GRACILIS—Flowers pure white, bell-shaped, quite dwarf; is also valuable as a pot plant for winter bloom. Hardy in all kinds of soil. $6.00 per 25.50c. each.

Honeysuckle, Bush or Upright. Early blooming; very fragrant.

Hydrangea paniculata grandiflora. Of spreading form, bearing immense pyramidal panicles of white flowers more than a foot long. A handsome shrub, bearing in spring clusters of perfect flowers that give exquisite delight. CRENATA FL., Double flowering and exceedingly handsome variety; flowers white, tinged rose. GRACILIS—Flowers pure white, bell-shaped, quite dwarf; is also valuable as a pot plant for winter bloom in all kinds of soil. 50c. each.

Hedges.

These hedge plants, used instead of unsightly and expensive wooden fences, are most valuable, economical and ornamental. Live hedges increase yearly, and are usually very satisfactory, both in appearance and as a protection against winds.

Box. Tree. Beautiful evergreen hedge; not thorny in sand, but is so in clay or black land, where it always does well. Small plants, 75c.; large plants, 25c. each.

Privet, California. Nearly evergreen; a strong pyramidal shrub, with bright green leaves and white flowers; makes a most desirable hedge; grows very rapidly trimmed in any shape. $6.00 per 100.

Arbor Vitae, Chinese. Evergreen; fast growing; ornamental hedge when neatly pruned; rich color. 18 to 24 inches, 25c. each.

EVERGREENS.

It is now no longer necessary to press the claims of Evergreens in this section. There is no ground throughout the country everywhere to need any other argument to convince people that they will "do." Still, not all the varieties are successful in Western climates, and it is necessary to know which will grow best in any given location. Here is a list of the most hardy, and the shade, heat and moisture are all suited to this variety.

Cedar of Lebanon. A handsome and vigorous tree, with wide-spread branches; attains a great size. 50c. to $2.00.

Crape Jasmine. This is a good plant for Southern and Eastern States; but too tender for here. 25c. to $1.00.

Cedrus deodara. Another very vigorous and large-growing Cedar, with lighter green foliage. 50c. to $2.00.

Cupressus pyramidalis. (Pyramidal Cypress.) Compact, upright growth very pretty; keeps its leaves well all winter.

Euryonymus japonica. A hardy and ornamental plant, which rich. hardy in all parts of the country. $1.00.

Magnolia grandiflora. This is the grandest of all greenwoods and flowering trees; hardy in this latitude. There is now a number of plants with white blossoms, 50c.; 2-foot, $1.00; 4-foot, $2.50. (See cut, page 30.)

Osmanthus. A good evergreen (grows 12 to 15 feet high). Hardy 200 miles south of Fort Worth; pink and white. Small plants, 25c.; larger plants, 50c. to $1.00.

Pittosporum Tobira. Like the osmanthus, it is not quite

HEDGE PLANTS.

The Hardy Chinese Matrimony Vine.

(Lyciun chinensë.)

It is a most vigorous hardy climbing plant when trained to an arbor, fastened to a fence; attached to a tree, to the side of a house, the pillars of a porch, or in any location where a hardy vigorous climber is desired. It sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers, which are succeeded by brilliant scarlet berries, nearly an inch long, every branch being loaded with flowers. Price, 25c. each, $2.50 per dozen; young plants (which will bloom and fruit abundantly this year), 25c. each, $2.25 per doz.
Flower Seeds.

FOR FALL AND WINTER PLANTING.

ANNUALS AND BIENNIALS.

ANNUALS.—Plants known as annuals are raised from the seeds; perfect their flowers, mature their seed the same season, and then perish; they are divided as follows: Hardy, half-hardy and tender. Hardy annuals are such as will bear a hard frost; half hardy annuals will bear but little; tender annuals will not bear the frost at all.

A Collection of Annuals, in 12 different varieties (our own selection), 40c.

A Collection of Annuals and Biennials, in 25 varieties (our own selection), 75c.

We would urge our friends and customers to plant the following seeds early, if you would hope for a great success:

Pansies, Phlox, Sweet William, Sweet Peas, Carnations and Picotees, also the new Margaret Carnation Plant—all of these in open ground, as they are hardy and require but little care for germination; Sweet Peas, and there is no doubt but this is one of the finest annual flowers grown, provided it is planted early, no matter that the ground be hard; Phlox should be planted early. We catalogue only such things as you should plant now. See our new spring catalogue for general list of flower seeds.

All flower seeds sent free by mail at prices quoted.

Pansy, Cassier Giant Odier, or Five-Blockered. Mixed colors; many beautiful colors; each of the five petals is marked with a large dark block. Per packet, 20c.

Cardinal. A rich brown scarlet; the brightest red pansy grown; the three lower petals are marked with a large dark block. Per packet, 25c.

Peperom Williams. Dark blue. 10c.

Lord Beaconsfield. Violet, lavender and white. 10c. pkt.

Snow Queen. Pure satiny white. Per packet, 10c.

New Margaret Carnations.

A magnificent new class of Carnations, and, without exception the most abundant bloomers of all. They bloom in
FLOWER SEADS—Continued.

about four months after sowing the seed. The flowers are of perfect form, large, and very sweet scented. The brilliant colors range through many beautiful shades of red, pink, white, variegated, etc.; what is of special value, the caix never bursts. Those sown in spring commence flowering in early summer, and continue to bloom in profusion until checked by frost, when they can be potted and taken in the house and will flower all winter. though, if intended specially for winter flowering, it will be better to sow later in the season. They come about eighty per cent. double. The plants are quite dwarf, much branched, compact and robust in habit, standing upright without support. Mixed colors— Packet, 10c.; 3 for 30c.

Margaret Carnations, white. Finding that this valuable race will produce self-colors fairly true from seed, we now offer a pure white flowering variety, of which 75 per cent. accurately represent the type. Packet, 20c.

Margaret Carnations, Very Dwarf. These Carnations are about 4 inches dwarfer than the semi-dwarf class, growing only 9 to 13 inches high. Eminently suitable both for borders and pot culture. Packet, 30c.

Giant Triondian. Mixed colors, containing all the large flowered and all shades, $1.50. Per packet, 15c.

Good Mixed Pundees. Large flowered, our own mixture. Packets, 5c. each; 6 for 30c.

The Phlox

Drummondii for splendid mass of color and a constant display, is not excelled by any other annual or perennial. It has every desirable quality for this purpose. The colors range from the purest white to the deepest blood purple or crimson. Seed may be sown in the open ground in March, or in hot bed or cold frame earlier; and in either case, from May, during the summer and Autumn, they make a most brilliant bed of showy, yet delicate flowers, blooming continuallu until frost. A good ribbon bed of the Phlox is a most dazzling sight, and there is nothing so cheap. In a good rich soil it will grow 18 inches or more in height. Set the plants about one foot apart; easily transplanted. Per pkt, William I. Crimson striped. 5

Brilliant Scarlet. 5

Deep Blood Purple. (Black Warrior.) Extra. 5

Alba. Pure white. 5

Rose. New charming. 5

Many Choice Varieties Mixed. Per packet, 5c.; ounce, 50c.; 1/2 ounce, 30c.

Star of Queensland. (Fringed Phlox.) The center of each petal runs out into a point 1/4 to 1/2 of an inch beyond the edge, which gives the flowers a regular star-like form; the plant grows about 1 1/2 feet in height, of compact habit, and bears large umbels of flowers. They are as easily grown as the common Phlox and flower just as profusely during the entire summer. Extra Fine Mixed Seed, comprising many varieties of this odd and beautiful strain. Per packet, 10c.; 3 packets, 25c.

Phlox Nana Compacta—New Dwarf Sorts. A quite distinct strain. Dwarf and compact growth; very desirable for pot culture and ribbon bedding. 9 inches, Choice Mixture, per packet, 10c.; 3 packets, 25c.

Sweet Peas.

A very beautiful, free-blooming climbers, very profitable to grow, because the cut bloom meets with ready sale in any market. One of the most popular flowers in cultivation and sure to please under the most ordinary treatment; a favorite flower with everybody for personal wear or table decoration. The strain we offer is unexcelled, and contains many of the finest old and new colors. Prize not only for the beauty of the flowers, but also for their delightful fragrance; easily grown and invaluable for trellis work, covering walls, unsightly objects, etc. Plant four inches deep, very early in the spring. Hoe the earth toward the vines without ridging, and give support for the vines to run upon. Hardy; 6 feet high.

New American Sweet Pea.

Blanche Perry. One of the most popular varieties ever introduced. It is earlier and harder than any other, of dwarf and compact growth; can be grown without support; desirable for forcing on very sweet flowers, of choice color, and are produced in great profusion: of a beautiful pink and white color. Per packet, 5c.; 4 ounces, 30c.; our choice.

Orange Prince. Of rare beauty: bright orange-pink, flushed scarlet; wings rich rose, veined with pink. Per packet, 10c.; ounce, 30c.

Splendour. Rich bright pinkish rose, shaded with crimson; flowers large and of fine form. Per pkt, 10c.; ounce, 30c.

Queen of England. Grand, pure white flowers of extra large size, specially choice. Per packet, 10c.; ounce, 30c.

Princess of Wales. Shaded and stained with mauve on a white ground, in the most pleasing manner. Per packet, 10c.; ounce, 15c.

Queen of the Isles. A beautiful variety; large flowers, handsomely mottled and striped with blue and red. Per packet, 10c.; ounce, 30c.

Grand Blue. This is one of the most effective and handsome. It has bright, pure blue wings, slightly shaded with maroon, standard and petals rich deep purple touched with rose. Per packet, 10c.; ounce, 20c.

Invincible Carmine (Cardinal). Flowers of this beautiful variety are large, crimson carmine; brightest colored of all Sweet Peas. Per packet, 10c.; ounce, 30c.

Iva Eckford. Creamy white, suffused rosy pink. Per packet, 10c.; ounce, 30c.

Adonis. Charming rosy pink color; Per pkt, 5c; oz. 15c.

Apple Blossom. Charming pink rose, wings blush. Per pkt, 10c.

Boreatton. Crimson color, shaded rose. Per packet, 5c.; ounce, 15c.

Butterfly. White, laced with blue. Per pkt, 5c.; oz. 15c.

Fairy Queen. Flesh color. Per packet, 5c.; ounce, 15c.

Indigo King. Maroon purple, blue wings. Per packet, 5c.; ounce, 15c.

Painted Lady. Rose and white. Per pkt, 5c.; oz. 15c.

Pure White. Flower snow white. Per pkt, 5c.; oz. 15c.

Scarlet Striped. Per pkt, 5c.; ounce, 15c.

Miscellaneous Field and Garden Seeds

FOR FALL PLANTING IN COLD FRAMES OR OPEN GROUND.

TESTED VEGETABLE SEEDS—GENERAL LIST.

In the following pages we have endeavored to list the cream of all varieties best adapted to the South, weeding out many varieties that are catalogued by Northern seedmen, but which our experience has proved to us are unworthy in this section. We take great pains to inform ourselves fully as to the true character of everything offered. It is our constant aim to gain and hold the confidence of all our customers and assure them from disappointment.
SEEDS POSTPAID BY MAIL.

 Please bear in mind that the prices in the following list include prepayment of postage by us on all seeds offered by the packet, ounce, quarter-pound, pound, pint or quart. Thus you have only to send us the catalogue price, and we guarantee safe delivery by mail, postage prepaid. If the seeds are to be sent by express at the buyer's expense, deduct eight cents for a pound, eight cents for a pint, and fifteen cents for a quart. Half-pounds supplied at pound rates, half-bushels at bushel rates. 

 MARKET GARDENERS, or other large planters requiring larger quantities of seed than are here offered, are invited to write to us for special prices, particularly purchases of peas, beans, corn, onions, spinach, cabbage and turnips. In writing please state plainly whether you are a market gardener, florist, dealer in seeds, etc.

 OUR PRICES. In comparing our mail prices, especially on heavy seeds, such as peas, beans and corn, by the quart, pint and half-pint, and other seeds by the pound and quarter-pound, you must bear in mind that the postage is added, while a number of other seedmen give you prices without including postage, but require you to remit, in addition, eight cents per pound and fifteen cents per quart to pay for postage, thus making their prices equal to and frequently more than ours.

 PACKET SEED DISCOUNTS. — This does not refer to seeds offered by weight or measure, but to seeds in packet only; nor does it refer to potatoes, onion sets or bulbs, as some mistook last season, neither to seeds in packets.

 On an order of $5.00 ........................................ 10 per cent.
 On an order of 10.00 ........................................ 12 per cent.
 On an order of 20.00 ........................................ 15 per cent.

 OUR NINETY-CENT COLLECTION.

32 packets for 90 cents, free by mail. At the low price at which the collection is sold, we can offer no allowances.

1. BEANS, Mammoth Wax Dwarf. Yellow pods, early.

2. Golden Cluster. Best pole or corn bean.

3. BEET, Dutch. Very early and good.

5. CABBAGE, Extra Early Jersey Wakefield.

7. CELERY, Golden Heart Dwarf.

13. LETTUCE, Curled Simpson.

15. WATERMELON, Ice Cream. Quality can't be beat.

17. MUSKMELON, Extra Early Hackensack. A No. 1.

18. ONION, Yellow Danvers Globe. Best general crop.

19. ONION, White Silverskin. For table and pickles.

20. PEPPER, Ruby King. Sweet; largest of all.

22. PUMPKIN, Sweet or Pie. Best table.

23. PEAS, Alaska.

25. RADISH, Long Scarlet. Good for forcing in or outside.

27. Our Mixture.

29. Orange Marrow. New; very fine.

30. TOMATO, Livingston's Beauty. No better.

32. TURNIP, Purple-Top Strap-Leaved.

In offering this sort last season we gave the introducer's description, which stated that it was very much inferior than Early Summer. We have made a very careful comparative test on our trial grounds of this variety last season, in comparison with a number of other sorts, and can fully endorse all the claims made for it, excepting we did not find it earlier than our strain of Early Summer. Customers also, so far as heard from, were well pleased with it. It is rightly called a thoroughbred sort, on account of its remarkably uniform size and shape, and its reliability for heading.

Efforts in selecting stock seed have constantly been made with a view of securing the largest early heads with the fewest loose leaves. The best heads are remarkably solid and uniform in color as well as shape and size. The main features of a good Cabbage is TENDERNESS, and in this respect it is not surpassed. While it is all that can be desired for earliness, it is also VALUABLE AS A LATE CABBAGE, if sown in July, and plants set out about the middle of August. Set plants 18 inches apart in rows, with no space between the rows for cultivation, and 9,000 plants can be set on the acre, NINETY-FIVE PER CENT. of which, in an ordinary season, and with reasonable cultivation, will make good merchantable heads. Packets, 10c; ½ ounce, 15c; ounce, 25c; ½ pound, 40c; pound, $1.00.

Extra Early Express, Extra Early Etampes, Early Flat Dutch. Packet, 5c; oz. 20c; ½ pound, 60c; pound, $2.00.

Early York. Packet, 5c; oz 15c; pound $1.25.

All Season, Saxe Head, Early Winnipeg, Early Jersey, Wakefield, Henderson Early Summer, Fottler's Brunswick Premium Late Flat Dutch. Packets, 5c; oz. 25c; pound, $2.00.
JERUSALEM ARTICHOKE.  
Pecks, 50c; bushels, $1.50.  
BEANS—DWARF BUSH.  
Green Pods Extra Early Sorts.  
Extra Early Round Pod Valentine.  
Early Black Beans.  
Early Warwick.  
Long legged, floury.  
Refugee or Thousand for One.  
Remember that we pay the postage on Beans at the prices quoted.  
Large Packets.—Customers write us that our packets contain more seeds than others.  
Quart and Pint Prices include postage; if to go by express at buyer's expense, deduct 15 cents per quart, or 8 cents per pint, from the prices below.  
Bushel and ciek Prices see special page at end of this list.  
Packets, 5 cents; pints, 25 cents; quarts, 45 cents.  
Dwarf Wax or Yellow Pod Vareties.  
Bast of the World Challenge Dwarf Black Wax.  
Golden Eyed Wax.  
Hoback 25c.  
Wardwell's Kidney Wax.  
German Black Wax.  
Violet Flagot Wax.  
Per packet, 5c; pint, 30c; quart, 55c.  
BEETS.  
Henderson Snow Ball.  
Packet, 25c; 4 oz. 50c; oz. $1.00.  
Half Early Paris.  
Packet, 25c; 4 oz. 50c; oz. 65c.  
Extra Early Dwarf Erfurt, Packet, 20c; 1/4 oz. 75c; oz. $1.50.  
Please bear in mind that we are forced to save space—to leave descriptions out of this catalogue to parties wishing to make a purchase of seed and are not familiar with name please write us and we will send you our last Spring Catalogue.  
Our new catalogue of 1895 will be out about January 10th.  
If you are not our customer write and get our Catalogue.  
We want your trade, and we believe you want to buy your goods at home, provided you can get what you want, and we are of the opinion we have it.  
For the following seeds see our Spring Catalogue:  
Carrots, Celery, Sweet Corn, Cucumbers, Egg Plant, Cantaloupes, Watermelon, Peppers, Tomato, Turnip, Buckwheat, Spring Rye, Spring Barley, Seed Corn, Sow Oats, Bloom Corn, Wireless Sweet Potato, Pumpkin Yams, Cow Peas, Watermelons, and other forage plants, save and except the following:  
SACALINE.  
The New Forage Plant. What is Said About it.  
Note.—Personally we know nothing of this new plant only that it has been impossible to obtain it. Five years ago a customer of ours wanted us to obtain for him a few ounces of the seed, or some of the roots. We found the seed was worth $1.50 per pound. Our customer concluded to wait until it became cheaper. We are happy to say we can now offer this wonderful forage plant on very reasonable terms.  
Gives three and four cuttings per year. Produces 90 to 180 tons of good forage per acre. An excellent soil enricher. Grows fourteen feet high by June. Affords shade to cattle in summer. Will not drown it. Fire will not kill it.  
Cattle cannot destroy it. Seed sold at $1.00 per pound!! Endorsed by the highest authorities.  
What leading horticulturists say of this new Forage Plant.  
From L. H. Bailey, Professor of Horticulture, Cornell University: “We are growing Polygonum Sacallinense the year for the first time. From everything which I can learn from other sources, I am prepared to believe that it will be a valuable plant for many parts of the country.”  
From Mr. Samuel Wilson: “I want something extra good in the shape of a forage plant. The most of our fall cultures go to Texas, New Mexico, Arizona and other places where an everlasting forage plant is needed, something that will grow in dry places without irrigation, and will flourish on the burning sides of volcanic mountains. This new and wonderful forage plant will do. We have a plant, sent by you, growing on our grounds. It seems to get right up without any care or trouble, and spreads rapidly. Now, what I want to know is whether you will let me put it in my fall catalogue, and get it introduced into these dry countries. This would certainly help your sales next spring and for a long time to come.”  
From Mr. Charles Goodnight, Goodnight, Texas. The pioneer ranchman and farmer of the north plains. In a conversation he said: “What you and others say about the new fodder is at least interesting, and as in this age every intelligent farmer should, I think, be ready to take advantage of any new and successful agricultural experiment I want you to let me in on your new plant, and if it will do what is claimed for it, and I am of the opinion it will, the question of stock farming will be settled. I have, in my time, tried a number of forage plants and have made quite a success with some of them, and flat failures with many; but the trouble, in my judgment, has been those we have made failures with came from the wrong part of the globe SACALINE, in my opinion is what we want—coming as it does from Siberia, where it grows phenomenal crops. The fact of its growing on dry, barren and rocky soils, and where no other plants will grow certainly recommends it as a plant for Texas.”  
From Mr. W. B. Smith, Director of the White House Gardens and ex-President Society of American Florists: “It is a plant of immense value to cattle raisers. Come to Washington and call the attention of the Agricultural Department to it.”  
From Mr. Robert Craig, ex-President of Society of American Florists: “Your Sacaline is certainly a wonderful plant. It has made tremendous growth. I have fed it to horses, and they seem to like it.”  
Dr. Wm. Van Fleet, Editor of Success With Flowers, says: “I have taken a hundred plants of Sacaline to my farm in
Virginia, where fodder is extremely scarce. It will certainly be of great value in that State.

From Antoine Winter, West Grove, Pa.: "The farmers around here are very much interested in your new forage plant. I have no doubt you can sell thousands of it here as soon as you have sufficient stock on hand. It is a plant that can be raised on weeds or grass, and plants sent to me to their utmost capacity!"

From Charles H. Allen, Floral City, S. C.: "What I hear and read about Sacaline assures me that it will become a valuable forage plant. As soon as you are ready to put it on the market I want a large number of the plants."

From Major Albert Bonafon: "I have lived among cattle raisers in the West for years. If I were to have a choice of grain crops I would not be able to raise enough plants to supply the demand. There is a fortune in it for you, if you do not let anyone get a start on you!"

From Mr. F. B. Mills: "You may reserve for me 20,000 roots of Sacaline and ten pounds of the seed."

From John A. Salzer: "Book our order for 10 sacks of Sacaline in addition to 25 pounds ordered before."

From George W. West, Bermuda, S. C.: "Do you think it possible a one-fourth of what is said about Sacaline is true, it will certainly prove a most valuable plant for the West Indies, where we need forage at all times. I should be pleased to introduce it here, and will undoubtedly call the attention of our government to it."

From Mr. John German, Haddonfield, N. J.: "I planted the root of Sacaline which you sent me in the driest spot on my farm, where clover and even grass wouldn't grow. Yet in three months it made a solid bed six inches deep, the air ten feet in circumference. Not a leaf wilted during a drought of nearly ten weeks.

CLOVERS.

These prices constantly subject to fluctuations, therefore merely suggestive.

If you do not do what you want, ask your merchant to write to us about it, or you drop us a postal card.

Latest quotations given promptly upon application.

Alskie Clover (Trifolium Hybridum). The earliest large clover. Possible a hybrid between the Red and White, possessing qualities common to both; productive, sweet, permanent, extremely valuable both for pasture or for making hay. Closer-silk lands will sometimes produce fine crops of Alsike, which lands, after three years in Alsike, and an intermediate grass, will again produce Red clover. The flowers are a distinct light pink, and afford fine pastureage for bees. This clover seeds itself freely the first year. Sow 12 pounds to the acre. Per pound, 25c.

Giant Sain Foin (Onobrychis Sativa). This (not a clover), in some sections, is the best forage plant, producing an immense quantity of green food and, under favorable conditions, large crops of hay. It requires a calcareous soil, and will not succeed north of the Potomac or Ohio. It makes a dense stand of high value as food for fowls. Sow 10 pounds to the acre. Per pound, 5c.

Japan Clover (Lespedeza Striata). Per pound, 50c.

Lucerne, or Alfalfa (Medicago Sativa). One of the most valuable among the clovers. Standing for years, as it nearly always does. Its roots downward till they are ten to fifteen feet below the surface. It resists the dry-est weather, and when every blade of grass droops for want of moisture it holds up fresh and green as in aerial spring. It does not succeed on compact clay nor on land with impermeable subsoil. Far from exhausting land, it increases the fertility, as has been fully established. Sow 20 pounds to the acre. Per pound, 75c; 50c. per quart, 35c.

Red Clover (Trifolium Patens). It is the most widely cultivated of the clover plants. Loosening the soil and admitting the air, and drawing nitrogen from the air, it is one of the best of all clover plants. Sowing the seed in spring is not always best. An excellent plant for hay seed. It is useful for a single crop, but does not remain productive for several years. Sow 10 pounds to the acre. Per bushel (60 pounds), $1.00; per quart, 50c.

Red Clover, Mammoth. Per bushel (60 pounds), $1.00; per quart, 45c.

Scarlet Clover (Trifolium Incarnatum). The most beautiful of all clovers, readily distinguished by the bright crimson color of its flowers. Exceedingly productive and very palatable to cattle. It is the latest of all the clover family, and thus affords a desirable succession of green food. At present in much demand for the smaller varieties and from which proven valuable. Sow 10 pounds to the acre. Per pound, 15c.

White Dutch Clover (Trifolium Repens). Not a heavy producer of hay but invaluable in permanent pastures. Will grow on any soil, but luxuriates in damp locations and in return seasons for grass. It is a good clover for hogs, and is deserving of more general use, affording rare feed, but on thin soils will not succeed. Sow 12 pounds to the acre. Per quarter-pound, 10c; half-pound, 15c; pound, 30c.

Canadian Blue Grass (Poa Compressa). The hardest grass in cultivation—should not be confounded with the Kentucky Blue Grass. It makes a first-class clover hay and is one of the very few grasses which produce a very rich milk; it is especially relished by sheep. Its bluish-green stems retain their color after the seed is ripe. It shrinks less in drying than most other grasses. It is an excellent grass for dry, sandy, thin soils and banks, and for covering the surface of rocky soils. Quart, 25c.; bushel, 45c.; per ton, $2.00.

Kentucky Blue Grass. (Fancy, triple cleaned.) Valuable for pasture when mixed with other varieties. Quart, 15c.; bushel, 1; grade, 1. It is at several experimental stations shown to be a very valuable hay crop. Orchard Grass. One of the most desirable pasture grasses. Quart, 25c.; bushel, 12 pounds, about $2.75. Scarlet Millet. Very popular throughout the West. Sow 50c. per pound. Herd, or Red Top Grass. A native valuable permanent pasture, as a mixture of meadows or pasture. Quart, 25c.; bushel, 10 pounds, $1.00; in sacks of 500, about $1.40. East Indin, or Pearl Millet. Cultivated for fodder. One pound, 25c.; 50c. and one, $1.00. Hungarian Millet Grass. One of the most valuable annual forage plants. Quart, 10c.; bushel, 45 lbs., about $1.50.

SEED POTATOES.

Selected seed from the best seed potato growers.

Chesapeake, Trumpet, and early varieties, early Ohio Peerless, Burbank, New York New.

See Spring Catalogue for prices.

ONION SETS.

For January delivery: Whites $1.25, Reds $4.00, Yellow $1.00 per bushel.

For later prices see Spring Catalogue.

Lathyrus Silvestris Wageri. FLAT PEA.

This plant has been experimented with in Germany and France for a number of years, and is pronounced a success. It belongs to the same species as the Italian and has the advantage of an everlasting pea. One of the agricultural papers in Germany describes it as follows: "This plant," it says, "has all the valuable traits of red clover or lucerne, without showing any of its defects (such as causing bloating in cattle) and besides is much richer in protein than the common clovers, since it flowers in hays when hay is given dusty), and surpasses them in every valuable essential of a fodder plant. It will endure a long period of years on the same place without losing its vitality, and becomes so productive that it is necessary to sow out necessitating a new seeding. It grows on any soil free from stagnant water, where no other forage plant will live, it flourishes with undiminished vigor and exuberance, scarce needing rain after it is once well established the second year. After that time it needs no further care except mowing and gathering."

It produces heavy crops, averaging about four tons per acre of cured hay. Its nutritious qualities twice exceed those of red clover or alfalfa, weight for weight; careful investigations show that the latter plant contains only 12 or 12.5 per cent of protein or albumen, while this improved lathuris, or everlastung pea, contains from 18 to 20 per cent of valuable nutritious substances.

"Cattle, as well as horses and hogs, eat it with avidity. The yield of milk from cows fed with it averages about 25 per cent more than when fed with any other fodder, and the fertility of the soil from the same amount of cattle is nearly doubled. The use of its hay as a protyoner is also said to affect the "preventive or cure against murrain or spleen diseases."

Directions for planting the seed are given as follows:

Sow on well-prepared land, foot apart, seeds about 2 to 3 inches deep, about 2 inches apart in the drills, and never watered and dried after from weeds afterwards. The plants can be transplanted either in spring or fall on any kind of soil, even on rocky ground, but not on heavy land.

To give our customers an opportunity to try this new variety we have imported a limited quantity of the seed from Germany, and offer to supply as many may desire. Per pt. 10c; oz. 30c; 1 lb $1.00; 5 lb $3.00.

DRUMM SEED AND FLORAL CO.,

FORT WORTH,

15 Choice Roses for $1.00.

TEXAS.
Our Catalogue Carefully

YOU WILL FIND MANY THINGS WELL WORTHY OF A PLACE IN YOUR COLLECTION OF SEEDS OR PLANTS.

TO THE FARMER:
We would ask you to read the following before purchasing LINTLESS COTTON SEED.

We are informed that the time has come when Lintless Cotton Seed, with every characteristic of the best, is required. It is now a recognized fact that Lintless Cotton Seed is worth twice as much as the old, because the seed is free from lint, and must, therefore, be worth at least twice as much as the old when the old sells for $1.00 a bushel. We are, therefore, asking $2.00 a bushel for Lintless Cotton Seed, and are prepared to sell as much as we can get, with the assurance that we will deliver as prompt as we can. We will be glad to give the new cotton seed to any one who wants it, and who will take it under these terms.

TEOSINTE.
Recommended as the most prolific type of maize plant yet produced. In appearance somewhat resembles corn, but its leaves are much larger and broader. It is a much more valuable variety, however, as several times during the season, you may allow it to remain without cutting, and still retain a height of twelve to fifteen feet. One bushel will make about twenty to sixty stalks under good conditions. It is hardy and does well in the tropical country, and the warmer the climate the better the yields. Should not be planted until the soil is well warm in the spring. Requires about four pounds of seed per acre. Plant in drills three feet apart, and two or three seeds every twelve inches in drill. Price, $3.00.

BERMUDA GRASS.
This plant has been naturally found in the Southern States. It is a tender, deep-rooted grass, growing in a dry and arid and low-lying soil, and grows resisting in any kind of soil; very hardy and free from pests. It is a crop of time, growing March to April and will grow an acre and very scarce and dear to small. Price, $5.00.

TEXAS BLUE GRASS.
The Texas Blue Grass grows on the banks of the rivers and streams, where it is better than almost any other Grass. It is the best and most desirable of the warm and dry regions. This grass seed will not grow in the fall or spring, it will not grow if it is ever watered, but the proper time for it is in the fall and October. The seed will grow in any soil, and the deep roots to two feet or more, and is difficult to obtain and cannot be sold. Price, $8.00.
